

MASTER SUBJECT INDEX

- Abrus precatorius* lectin, measurement of acute phase proteins 109 (1980) 257
- Absorption spectroscopy
 calibration of carotenoid band shifts 107 (1979) 10
 of oxygen-hemoprotein complexes at low temperature 106 (1979) 213
 of rhodopsin-phosphatidylcholine complex in hexane 107 (1979) 213
 of succinate dehydrogenase 104 (1979) 371
 see also: Photo acoustic spectroscopy; Time-resolved spectroscopy
- Acetamide, study of hydrolysis by amidase 106 (1979) 185
- O* γ -(2-Acetamido-2-deoxy- α -D-galactopyranosyl)-L-serine, NMR-study 107 (1979) 26
- Acetonide of 5-methylaminomethyl-2-thiouridine, occurrence in transfer RNA of *Escherichia coli* 103 (1979) 270
- Acetonitrile, effect on enzymatic conjugation of 1,2-dichloro-4-nitrobenzene with glutathione 101 (1979) 187
- Acetylated peptides, study of enzymatic deacetylation 106 (1979) 93
- Acetylcholine
 effect of ascorbic acid on release from *Torpedo* synaptosomes 108 (1979) 189
 effect of local anesthetics on α -bungarotoxin receptor binding 108 (1979) 356
 receptor
 affinity labelling by bromoacetylcholine 108 (1979) 20
 comparison of subunits from electric eel and *Torpedo californica* 101 (1979) 395
 -enriched membranes, occurrence of ATP-binding proteins 108 (1979) 37
 interaction with spin-labelled α -neurotoxin 110 (1980) 301
 preparation of monoclonal antibodies 106 (1979) 389
 protein
 of *Torpedo marmorata* 104 (1979) 99
 study of heat inactivation 108 (1979) 489
 study of interaction with neurotoxin II 106 (1979) 47
 study of reconstitution 105 (1979) 181; 108 (1979) 155
 study of transmembrane nature 102 (1979) 9
 see also: α -Bungarotoxin receptor
 receptors
 appearance on muscle cells 103 (1979) 33
 fractionation of antibodies 105 (1979) 303
 see also: Muscarinic receptors; Nicotinic receptors
 -stimulated turnover of phosphatidylinositol in synaptosomes, effect of manganese (II) 108 (1979) 279
- Acetylcholinesterase
 molecular forms in chick visual system 110 (1980) 91
 properties during development in slow tonic muscle 109 (1980) 9
- Acetyl-CoA carboxylase
 effect of acyl-CoA analogs 102 (1979) 223
 of lactating rabbit mammary gland, relation between phosphorylation and activity 103 (1979) 333
- Acetylenedicarboxylic acid dimethylester, effect on oxidative phosphorylation in mitochondria 108 (1979) 171
- N*-Acetylglucosamine
 binding to immobilized lysozyme at high temperature 108 (1979) 10
 -lipid compounds in *Volvox carteri* F. *nagariensis* 106 (1979) 321
- N*-Acetylmuramyl-L-alanyl-D-isoglutamine, mass spectrometry study 107 (1979) 254
- Acidic proteins of wheat germ ribosomes 103 (1979) 304
- Actin
 assay in teratocarcinoma cells by inhibition of DNase I 110 (1980) 305
 -binding protein of platelets, effect of storage 102 (1979) 257
 -DNase I complex, pulse fluorimetric study 109 (1980) 216
 effect of concanavalin A on action of 5'-nucleotidase 103 (1979) 77

FEBS LETTERS

-G, polymerisation by spectrin	104 (1979) 396
-F, aggregation with heavy meromyosin	105 (1979) 101
filaments, study of cystein residue	105 (1979) 259
inhibitory activity on DNase I and effect of phosphorylation	104 (1979) 284
-like protein	
contamination in chromatin of <i>Dictyostelium discoideum</i>	108 (1979) 233
of <i>Saccharomyces cerevisiae</i>	102 (1979) 55
presence in chromaffin granule membranes	101 (1979) 129
radioimmunoassay on a magnetic phase	110 (1980) 327
—spectrin complex of erythrocytes, EPR-study	105 (1979) 379
study of secondary structure at G—F transition	109 (1980) 134
Actinomycin D, effect on ribosomal RNA synthesis	107 (1979) 281
Actins	
immunological comparison of species from different sources	102 (1979) 69
of chicken tissues, evolutionary relationship	102 (1979) 219
Actomysin, effect of cyclic AMP on contractile system of smooth muscle	107 (1979) 371
Acute phase proteins, use of lectins in measurement in plasma or serum	109 (1980) 257
Acylamide amidohydrolase	106 (1979) 185
Acyl carrier protein of <i>Escherichia coli</i>	101 (1979) 253
Acyl-CoA analogs, effect on acetyl-CoA carboxylase	102 (1979) 223
Adenine	
arabinoside (ara-A) synthesis by use of bacterial transglucosylation	109 (1980) 261
determination of location in DNA	108 (1979) 427
nucleotide binding site of chloroplast coupling factor 1	107 (1979) 413
nucleotide carrier	
interaction with fluorescent 3'-ADP-analog	109 (1980) 197
see also: ADP/ATP transport protein	
nucleotides, relation with guanosine nucleotide system in hepatocytes	107 (1979) 198
Adenosine	
—cyclic AMP binding protein of rat heart	108 (1979) 395
deaminase, effect on 8,5'-cycloadenosine isomers	107 (1979) 363
effect on initiation of template-dependent RNA synthesis	102 (1979) 51
effect on thymocytes and splenocytes	107 (1979) 95
5'-monophosphate 2',3'-dialdehyde, modification of fructose 1,6-bisphosphatase	102 (1979) 29
triphosphatase (ATPase)	
calcium-independent phosphorylation	108 (1979) 495
complex, study of participating proteins	109 (1980) 280
effect of 2-mercaptopropionylglycine on FCCP treatment	107 (1979) 217
localisation in hepatocyte surface membrane	108 (1979) 374
of chromaffin granule membranes	103 (1979) 323
of cyanobacterium <i>Mastigocladus laminosus</i>	104 (1979) 66
of <i>Escherichia coli</i> , study of small angle neutron scattering	102 (1979) 244
of pancreatic islets	105 (1979) 40
phosphorescence polarization study of motion in membranes	108 (1979) 161
relation between membrane potential and proton transport	110 (1980) 337
requirement of proteolysis for release from cell membrane	103 (1979) 12
sensitive to <i>N,N'</i> -dicyclohexyl-carbodiimide in <i>Escherichia coli</i>	104 (1979) 339
study of Arrhenius discontinuities	107 (1979) 110
study of proteolipid in mutant <i>Escherichia coli</i>	109 (1980) 107
structural changes induced in rod outer segment membranes	107 (1979) 317
study of quaternary structure	101 (1979) 67
see also: Bacterial ATPase; Chloroplast ATPase; Coupling factor; Dynein ATPase; Mitochondrial ATPase;	
Proton translocating ATPase	
<i>S</i> -Adenosylhomocysteine hydrolase	101 (1979) 184
<i>S</i> -Adenosylmethionine	
decarboxylase, effect of spermidine	109 (1980) 299
effect on aminopropyltransferases	110 (1980) 323
effect on calcium transport into membrane vesicles of <i>Escherichia coli</i>	102 (1979) 241
synthetase, effect of dimethylsulfoxide	106 (1979) 25

Adenovirus 5 DNA, cleavage of terminal protein by nuclease S1	107 (1979) 355
Adenylate cyclase	
– β -adrenergic receptor system of liver, effect of bile duct ligation	107 (1979) 259
effect of cholera toxin in rat hepatocytes	104 (1979) 359
effect of crosslinking agents	109 (1980) 75
effect of cytoplasmic factor in human thyroid system	107 (1979) 269
effect of dimethyl 3,3'-dithiobispropionimidate in bovine corpus luteum	104 (1979) 294
effect of GDP on activation by β -adrenergic agonists in turkey erythrocyte membranes	108 (1979) 365
effect of guanine nucleotides	101 (1979) 85
effect of guanosine 5'-O-(2-thiodiphosphate) on GTP action	109 (1980) 275
effect of insulin in rat adipose tissue	105 (1979) 19
effect of peptide hormones in hypertensive rats	107 (1979) 86
effect of prostaglandin E_1 and adrenalin in fat cells	107 (1979) 100
effect of proteolytic activity on cation dependency	107 (1979) 105
in <i>Escherichia coli</i> K12, effect of α -methylglucoside	103 (1979) 238
of anterior pituitary, effect of vasoactive intestinal peptide	103 (1979) 229
of rat pituitary gland	108 (1979) 403
properties in development of <i>Dictyostelium discoideum</i>	110 (1980) 39
–receptor interactions	101 (1979) 213
relation with 5'-nucleotidase in mouse thymocytes	110 (1980) 30
role of arginine in active site	106 (1979) 153
system of rat liver plasma membranes effect of amphotericin B	106 (1979) 21
Adenylylimodiphosphate (AMP–PNP), study of release from mitochondrial ATPase	104 (1979) 215
Adipose	
cells, effect of colchicine and vinblastine on insulin binding and action	105 (1979) 329
tissue, effect of insulin on adenylate-stimulated adenylate cyclase	105 (1979) 19
Adipocytes	
difference in heat production in obese and normal weight individuals	101 (1979) 411
effect of PGE_1 and adrenalin on adenylate cyclase	107 (1979) 100
heterogeneity of β -adrenergic receptors	104 (1979) 431
Adjuvant activity of lipopolysaccharide of <i>Pseudomonas aeruginosa</i>	105 (1979) 120
ADP	
–analog interaction with oxidative phosphorylation and adenine nucleotide carrier	109 (1980) 197
/ATP transport protein,	
effect of ultraviolet light on atractyloside and bongkreikic acid binding sites	104 (1979) 425
of beef heart mitochondria	108 (1979) 390
–binding site in mitochondrial coupling factor F_1	103 (1979) 7
CD-study of interaction with myosin	105 (1979) 197
exchange on chloroplast coupling factor 1	101 (1979) 316
measurement in isolated cells and mitochondria	105 (1979) 90
metabolism in human umbilical endothelial cells	105 (1979) 286
–ribosylation, of histones of calf thymus	110 (1980) 227
Adrenal	
cortex, isolation of ACTH responsive cells	108 (1979) 331
gland, study of sterol ester hydrolase activity	102 (1979) 13
glomerulosa cells, effect of ACTH on angiotensin binding and aldosterone production	105 (1979) 325
medulla, effect of muscarinic receptor stimulation on cyclic GMP levels	105 (1979) 296
tumor cells, effect of ACTH on cholesterol ester uptake	101 (1979) 239
Adrenalin, effect on adenylate cyclase in fat cells	107 (1979) 100
α -Adrenergic stimulation of gluconeogenesis, effect of ouabain and potassium removal	106 (1979) 189
β -Adrenergic agonists, effect of GDP dissociation on adenylate cyclase in turkey erythrocyte membranes	108 (1979) 365
β -Adrenergic receptor	
–adenylate cyclase system of liver, effect of bile duct ligation	107 (1979) 259
heterogeneity of binding sites on adipocytes	104 (1979) 431
Adrenocorticotrophic hormone (ACTH)	
effect on angiotensin II binding and aldosterone production by rat adrenal glomerulosa cells	105 (1979) 325
effect on cholesterol ester uptake into adrenal tumor cells	101 (1979) 239
effect on polyphosphoinositide metabolism in rat brain	105 (1979) 110
isolation of responsive cells from rat adrenal cortex	108 (1979) 331

FEBS LETTERS

Affinity chromatography	
of chorionic gonadotropin-receptor complex	106 (1979) 193
of erythrocyte membranes	101 (1979) 43
of lactoferrin	109 (1980) 180
of lactoperoxidase	110 (1980) 200
of plasminogen by use of Procion red HE-3B	103 (1979) 162
of polypeptide from brown adipose tissue mitochondria	101 (1979) 35
of rabbit heart myosins	106 (1979) 197
Affinity electrode, assay of human serum albumin	106 (1979) 405
Aflatoxin B ₁ metabolism, in vitro by rat liver microsomes	101 (1979) 382
Alamethicin, transport across lipid membranes	104 (1979) 157
(D-Ala ² , N-Val ⁵)enkephalinamide, affinity for opiate and enkaphalin receptors	110 (1980) 88
Albumin	
assay by affinity electrode	106 (1979) 405
elevation of glycosylation in diabetic patients	103 (1979) 282
NMR, study of protein binding	101 (1979) 31
role in transport of thyroid hormones into hepatocytes	107 (1979) 227
Alcohol dehydrogenase, of C ₁ -utilizing microbes	101 (1979) 179
Aldosterone production by rat adrenal glomerulosa cells, effect of ACTH	105 (1979) 325
Alfalfa mosaic virus RNAs	107 (1979) 61; 109 (1980) 145
Aliphatic carbonyl compounds, induction of erythroid differentiation in murine erythroleukemic cells	109 (1980) 264
Alkaline phosphatase	
determination of activity with thermistor unit	101 (1979) 47
distribution in rat small intestine	104 (1979) 35
effect of protease inhibitors on isoenzyme conversions	105 (1979) 147
Allophycocyanin, in photosystem I of <i>Chlorogloea fritschii</i>	101 (1979) 110
Allosteric enzyme reaction system, calculation of Hill coefficient	103 (1979) 5
Alloxan cytotoxicity of pancreatic islets, effect of trace metals	105 (1979) 15
All-β proteins	101 (1979) 1
<i>Alternaria mali</i> toxin II	105 (1979) 337
Amidase, study of hydrolysis of acetamide	106 (1979) 185
Amidino hydrolase, <i>see</i> Methylguanidine amidinohydrolase	
Amines, effect on hepatocyte cell spreading	105 (1979) 345
Amino acid	
sequence analysis	
identification of 4- <i>N,N</i> -dimethyl aminoazobenzene 4'-thiohydantoin amino acids (DABTH-amino acids)	108 (1979) 87
liquid phase sequencing using 4- <i>N,N</i> -dimethylazobenzene 4'-isothiocyanate	108 (1979) 98
of cell-free translation product encoded by bovine corticotropin-β-lipoprotein mRNA	105 (1979) 357
oxidation of tryptophan residues in proteins	104 (1979) 115
peptide isolation	108 (1979) 81
solid phase sequencing using 4- <i>N,N</i> -dimethylazobenzene 4'-isothiocyanate	108 (1979) 92
use of oxymethylphenylacetamidomethyl-linkage in solid-phase Edman degradation	106 (1979) 89
transport	
in hepatocytes, effect of selenite	107 (1979) 77
kinetics of γ-glutamyl cycle	110 (1980) 192
role of γ-glutamyl cycle	105 (1979) 283; 108 (1979) 240
Aminoacyl-tRNA synthetases	
conservation of structure among plant species	102 (1979) 194
of yellow lupin, effect of polyamines	109 (1980) 63
study of protein-protein interactions	103 (1979) 71
2-Aminofluorene derivatives induced defective DNA, effect of antibodies	108 (1979) 66
5-Amino-levulinic acid synthetase effect of thioredoxin	101 (1979) 116
Aminopropyltransferases, effect of <i>S</i> -adenosylmethionine	110 (1980) 323
[<i>dimethylamino</i> - ¹⁴ C]Aminopyrine, effect of methionine and thyroid hormone on ¹⁴ CO ₂ exhalation	103 (1979) 366
3-Amino-1-(<i>m</i> -(trifluoromethyl)-phenyl)-2-pyrazoline (BW-755C), effect on arachidonic acid metabolism	110 (1980) 213
Ammonia, stable isotope study of oxidation to hydroxylamine	106 (1979) 401
AMP deaminase	
effect of limited proteolysis	102 (1979) 59
5', effect on 8,5'-cycloadenosine isomers	107 (1979) 363

Amphopterin B, effect on adenylate cyclase system of rat liver plasma membranes	106 (1979) 21
Amylase	
distribution in rat small intestine	104 (1979) 35
secretion from rat parotid glands, requirement of sodium	102 (1979) 4
Amylo-1,6-glucosidase	105 (1979) 35
Analgesics, study of enkephalin analogs	110 (1980) 85
Anesthesia, role of kidney in plasma glutathione concentration and redox state	109 (1979) 335
Anesthetics	
effect on cholesterol synthesis	102 (1979) 235
effect on fluorescence intensity of 1-anilino-8-naphthalene sulphonate labelled membranes	101 (1979) 399
Angiotensin	
II, binding by rat adrenal glomerulose cells, effect of ACTH	105 (1979) 325
converting enzyme effect of bradykinin potentiating peptides	107 (1979) 273
1-Anilino-8-naphthalene sulphonate-labelled membranes, effect of inhalation anesthetics	101 (1979) 399
Anthraquinones, synthesis in immobilized <i>Morinda citrifolia</i> cells	103 (1979) 93
Anti-actin antibodies, use in comparison of muscle actins from different sources	102 (1979) 69
Antibody	
–antigen binding, study by proton relaxation enhancement	102 (1979) 249
Fab' fragments, use for removal of rheumatoid factors in ELISA of insulin	102 (1979) 253
Antibodies	
against acetylcholine receptor, fractionation according to antigenic specificity	105 (1979) 303
effect on defective DNA induced by 2-aminofluorene derivatives	108 (1979) 66
Anti-concanavalin A antibodies, specific for carbohydrate binding site	102 (1979) 100
Anti-dansyl antibodies, conformation change after hapten binding	102 (1979) 103
Anti-dinitrophenol antibody, ESR study of segmental flexibility	101 (1979) 27
Antigen–antibody binding, study by proton relaxation enhancement	102 (1979) 249
Anti-hapten antibodies, ESR study of segmental flexibility	101 (1979) 27
Anti-heparin proteins of platelets, interaction with heparin	102 (1979) 75
Anti-ketogenic agents, effect on oxidation of palmitate in hepatocytes	103 (1979) 89
Antimycin A, effect on potassium transport in erythrocytes	110 (1980) 65
Antioxidants, effect on oscillatory ion transport in mitochondria	107 (1979) 151
Antipain, effect on alkaline phosphatase isoenzyme conversion	105 (1979) 147
Antithrombin	
III, interaction with heparin	102 (1979) 75
interaction with thrombin	106 (1979) 358
Antitumour activity of lipopolysaccharide of <i>Pseudomonas aeruginosa</i>	105 (1979) 120
Apolipoprotein	
A-I, interaction with dimyristoyl phosphatidyl choline	104 (1979) 231
CII, effect on hydrolysis of monoglycerides by lipoprotein lipase	106 (1979) 345
Apolipoproteins	
of high density lipoproteins	109 (1980) 43
study by gel electrophoresis	101 (1979) 21
Aprotic solvents, EPR study of superoxide ion	103 (1979) 176
Arachidonic acid, effect on 7,8-dihydroxy-7,8-dihydro benzo[a]pyrene metabolism	106 (1979) 13; 106 (1979) 17
Aromatic ring cleavage, by dioxygenase of <i>Sporotrichum pulverulentum</i>	104 (1979) 258
Arrhenius plot	
of Ca ²⁺ -ATPase activity, relation to membrane lipid fluidity	107 (1979) 110
of reaction kinetics of palmitoyl-CoA hydrolase	109 (1980) 194
Arylazidophospholipids, interaction with cytochrome <i>b₅</i>	106 (1979) 317
Arylsulphatase, effect of phosphorylation of microsomal membranes	103 (1979) 260
Ascorbate	
free radicals, formation by dopamine β -monooxygenase	108 (1979) 25
transport in brush border membrane vesicles	108 (1979) 473
Ascorbic acid	
effect on singlet oxygen	105 (1979) 195
oxidase of green zucchini squash, a crystallization study	107 (1979) 407
presence in cholinergic nerve terminals of <i>Torpedo ocellata</i>	108 (1979) 189
Asialofetuin–trifluorothymidine complex, effect on virus DNA synthesis in hepatocytes	103 (1979) 47
Asparagine- <i>N</i> -glycosyltransferase, study of acceptor specificity	103 (1979) 296

FEBS LETTERS

Aspartate aminotransferase	
of bovine mitochondria	101 (1979) 351
of chicken heart cytoplasm	106 (1979) 385
of turkey liver	108 (1979) 103
β -Aspartate kinase, intracellular localization in spinach	104 (1979) 303
Atebrin, effect on potassium transport in erythrocytes	110 (1980) 65
ATP	
$-\beta,\gamma$ -bidentate $\text{Co}(\text{NH}_3)_4\Delta$ -isomer binding to protein kinase	103 (1979) 265
-binding proteins	
of <i>Escherichia coli</i>	101 (1979) 166
occurrence in acetylcholine receptor-enriched membranes	108 (1979) 37
-binding site in mitochondrial coupling factor F_1	103 (1979) 7
-citrate lyase, phosphorylation by cyclic AMP-dependent protein kinase	109 (1980) 205
-dependent proton transport in lysosome membranes	107 (1979) 110
effect of ascorbic acid on release from <i>Torpedo</i> synaptosomes	108 (1979) 189
hydrolysis	
effect of pH on coupling to substrate reduction in nitrogenase	110 (1980) 35
relation with phosphate transport in liver mitochondria	102 (1979) 301
measurement in isolated cells and mitochondria	105 (1979) 90
-pyrophosphate exchange catalyzed by valyl-tRNA synthetase	103 (1979) 274
synthesis	
in yeast mitochondria, effect of tribenzylphosphate	102 (1979) 18
linkage with hydrogen in chromatophores of <i>Rhodospseudomonas capsulata</i>	106 (1979) 29
Atractyloside binding sites of adenine nucleotide carrier, effect of ultraviolet light	104 (1979) 425
8-Azido-1, N^6 -etheno-ATP labelling of nucleotide binding site of mitochondrial ATPase	108 (1979) 253
S-(<i>p</i> -Azidophenacyl)-glutathione, effect of glyoxalase I	110 (1980) 262
Bacitracin synthetase	106 (1979) 275
Bacterial	
ATPase, study of covalently-bound sugars	104 (1979) 209
membranes of <i>Rhodospirillum rubrum</i> , labelling with fluorescamine	107 (1979) 409
membrane vesicles, determination of membrane potential from accumulation of <i>N</i> -methyldepropine	105 (1979) 171
Bacteriorhodopsin	
interaction with ionophores	101 (1979) 113
relation between electric signals and photocycle	109 (1980) 189
study of chemical modification	108 (1979) 243
study of proton transport in monomers	108 (1979) 307
<i>trans</i> -Bacteriorhodopsin, photoreaction at low temperature	101 (1979) 121
Bacteriophage	
AS-1 effect on glucose-6-phosphate dehydrogenase of <i>Anacystis nidulans</i>	105 (1979) 158
434 <i>cro</i> gene, identification of translation product	108 (1979) 56
fd, neutron scattering study	108 (1979) 61
fd RF DNA, effect of promotor modification on binding to RNA polymerase	102 (1979) 87
M13, study of capsid proteins	106 (1979) 8
P1Cm, DNA sequence of transposon coding for resistance to chloramphenicol and fusidic acid	110 (1980) 11
Pfl, neutron scattering study	108 (1979) 61
T4 DNA, role of gene 45 product	104 (1979) 187
$\phi 6$, identification of lytic enzyme	103 (1979) 234
ϕX 174 DNA, study of biological activity	110 (1980) 15
Basement membrane	
characterization of collagenous polypeptides	106 (1979) 379
collagen, study with use of bacterial collagenase	101 (1979) 265
Beauvericin, interaction with bacteriorhodopsin	101 (1979) 113
Benzo[a]pyrene	
derivatives, effect on histones	108 (1979) 321
4,5 oxide, study of enzymatic conjugation with glutathione	101 (1979) 187
<i>see also</i> , 7,8-Dihydroxy-7,8-dihydro benzo[a]pyrene	
Benzodiazepine receptor, solubilization in a non-ionic detergent medium	104 (1979) 149

in human mammary tumors	106 (1979) 301
phosphorylation of ATP-citrate lyase	109 (1980) 205
phosphorylation of pyruvate kinase in rat liver cytoplasm	101 (1979) 289
effect of	
concanavalin A in mouse thymocytes	110 (1980) 30
folic acid in binding activity	109 (1980) 27
12- <i>O</i> -tetradecanoyl-phorbol-13-acetate in fibroblasts	103 (1979) 38
effect on actomyosin contractile system of smooth muscle	107 (1979) 371
-independent protein kinase, of rat liver microsomes	106 (1979) 76
levels in chondrocytes of the proteoglycan-deficient chick embryonic mutant, nanomelia	108 (1979) 353
phosphodiesterase, of chicken erythrocytes	110 (1980) 287

production, effect of vasoactive intestinal peptide on release in a rat pituitary cell line (GH3/B6)	104 (1979) 165
receptor protein, of <i>Escherichia coli</i>	109 (1980) 121
relation with testosterone synthesis and protein kinase activity in mouse Leydig cells	107 (1979) 398
3',5'-Cyclic GMP, regulation by muscarinic receptors in adrenal medulla	105 (1979) 296
Cyclic photophosphorylation	
of purple membrane of <i>Halobacterium halobium</i>	102 (1979) 155
reduction of <i>c</i> -550 and cytochrome <i>b₆</i> by ferredoxin	102 (1979) 133
8,5'-Cycloadenosine isomers, susceptibility to various enzymes	107 (1979) 363
Cycloheximide, effect on	
mRNA for phosphoenolpyruvate carboxykinase	109 (1980) 112
ribosomal RNA synthesis	107 (1979) 281
Cystathioase of rat liver, number of arginine residues at binding site	108 (1979) 419
Cysteine biosynthesis in <i>Saccharomycopsis lipolytica</i>	101 (1979) 97
Cystic fibrosis, decrease in thermostability of α -mannosidase	104 (1979) 271
Cytochrome	
<i>b</i> , defects in granulocytes of patients with chronic granulomatous disease	110 (1980) 111
<i>b₅</i> , interaction with arylazidophospholipids	106 (1979) 317
<i>b₆</i> , reduction by ferredoxin in the dark	102 (1979) 133
<i>b₅₀</i>	101 (1979) 201
<i>b</i> -559 of <i>Methanosarcina barkeri</i>	105 (1979) 271
<i>c</i> cell-free synthesis	108 (1979) 141
<i>c</i> -chromium complex, NMR study	107 (1979) 427
<i>c</i> , effect on ascorbate free radical formation by dopaminic β -monooxygenase	108 (1979) 25
<i>c</i> oxidase	101 (1979) 295
comparison of cytochrome <i>c</i> analogs	108 (1979) 131
model for heme <i>a₃</i> /copper active site	106 (1979) 265
study of type of copper	106 (1979) 135
<i>c₂</i> –reaction centre in chromatophores of <i>Rhodospseudomonas</i>	101 (1979) 207
<i>c₂</i> , study of photo-oxidation kinetics	105 (1979) 137
<i>c</i> -556 of <i>Agrobacterium tumefaciens</i>	101 (1979) 336
<i>d</i> , copurification with cytochrome <i>b</i> -555 and <i>b</i> -558	109 (1980) 1
<i>f</i> , role in ferredoxin-dependent electron transport	105 (1979) 365
<i>o</i> of <i>Escherichia coli</i> , study of oxygen binding	101 (1979) 56
oxidase	
incorporation into rabbit erythrocytes via proteoliposomes	102 (1979) 230
study of catalytic properties	106 (1979) 39
subunit 2 of <i>Neurospora crassa</i> , synthesis in mitochondria	107 (1979) 327
vesicles, study of calcium transport	109 (1980) 99
<i>P</i> -450	
developmental study of inducibility in rabbit liver	105 (1979) 217
ESR study of active center	101 (1979) 195
of <i>Candida tropicalis</i>	105 (1979) 143
role in rabbit liver microsomal 12 α -hydroxylation	106 (1979) 235
rotational diffusion in rat liver microsomes	102 (1979) 151
dealkylation of 7-ethoxycoumarin at subzero temperature	102 (1979) 117
<i>P</i> -515, effect of pigment system 1 in chloroplasts	106 (1979) 257
Cytochrome system of mitochondria, study of Bohr effects	105 (1979) 213
Cytochromes	
interference in the measurement of calcium	109 (1980) 93
mechanism of reduction by quinols	105 (1979) 189
Cytokinin	
binding to ribosomes of <i>Mercurialis annua</i>	102 (1979) 211
cell free synthesis in system from tobacco tissue	107 (1979) 15
mass-spectrometry study	107 (1979) 21
Cytoplasm, protein transport to mitochondria	103 (1979) 203
Daunomycin, study of binding to DNA	107 (1979) 348
Decamethylene- <i>bis</i> -trimethylammonium, effect on NADH oxidation	108 (1979) 28
Decarboxylation of vanillic acid by <i>Sporotrichum pulverulentum</i>	103 (1979) 98

FEBS LETTERS

Density gradient centrifugation of male and female rat adrenal cortical cells	108 (1979) 331
Deoxycholate, effect on peptidoglycan synthesis in <i>Micrococcus luteus</i>	105 (1979) 151
11-Deoxycorticosterone, effect on tyrosine aminotransferase of fetal rat liver	102 (1979) 169
11-Deoxycortisol, effect on tyrosine aminotransferase of fetal rat liver	102 (1979) 169
Deoxyhemoglobin S, effect of erythrocyte membranes on polymerization	110 (1980) 107
5'-Deoxy-5'-S-isobutyl thioadenosine, effect on nucleoside and carbohydrate transport	101 (1979) 233
Deoxymyoglobin, Raman spectroscopy study	104 (1979) 376
Deoxyribonuclease I (DNase I)	
—actin complex, pulse fluorimetric study	109 (1980) 216
effect on histone H ₄ enriched chromatin	110 (1980) 164
inhibitory activity of actin and effect of phosphorylation	104 (1979) 284
use in assay of actin in extracts of teratocarcinoma cells	110 (1980) 305
Deoxyuridine triphosphatase (dUTPase), effect on bacteriophage ϕ X174 DNA	110 (1980) 15
Desferrioxamine B	110 (1980) 271
Desmethylspheroidenone, major carotenoid of <i>Rhodospseudomonas capsulata</i>	110 (1980) 47
Deuterium exchange, study of mechanism of proton transport in purple membranes	106 (1979) 135
Development	
changes in cell surface glycoproteins of <i>Volvox carteri</i>	104 (1979) 249
glutamate receptor in rat cerebellum	109 (1980) 175
of avian erythrocytes, study of tubulin and its assembly promoting factors	107 (1979) 383
polyamine synthesis in <i>Leishmania</i> species	106 (1979) 202
study of	
acetylcholinesterase in slow tonic muscle	109 (1980) 9
adenylate cyclase in <i>Dictyostelium discoideum</i>	110 (1980) 39
induction of cytochrome P-450 in rabbit liver	105 (1979) 217
liver nuclear histones	108 (1979) 326
plasma membrane glycoprotein involved in adhesion of <i>Polysphondylium pallidum</i>	108 (1979) 379
synthesis of plasma membrane proteins of <i>Polysphondylium pallidum</i>	108 (1979) 219
Dextran sulfate, effect on fibronectin—collagen interaction	107 (1979) 51
Diabetes	
effect of bradykinin on insulin action	106 (1979) 125
effect on glycosyl-albumin levels	103 (1979) 282
induced by streptozotocin, effect on intracellular sodium in rat skeletal muscle	106 (1979) 375
major cell surface glycoproteins of rat liver membranes	104 (1979) 389
relation with obesity and heat production	110 (1980) 8
Diacridines, binding to calf thymus DNA	104 (1979) 261
Diadenosine	
pentaphosphate (Ap ₅ A), conformation study	107 (1979) 121
tetraphosphate (Ap ₄ A), conformation study	107 (1979) 121
Diamine oxidase, preparation of antibodies	104 (1979) 154
1,4-Diazobicyclo (2,2,2)-octane, quenching of singlet oxygen	108 (1979) 152
Dibromothymoquinone, interaction with CoQ—cytochrome b locus of mitochondrial respiratory chain	109 (1980) 283
Dibutyryl 3',5'-cyclic AMP, effect on cAMP-dependent protein kinase of human goiters	104 (1979) 21
1,2-Dichloro-4-nitrobenzene study of enzymatic conjugation with glutathione	101 (1979) 187
5,6-Dichlororibofuranosylbenzimidazole, phosphorylation in salivary gland cells of <i>Chironomus tentans</i>	107 (1979) 431
N,N'-Dicyclohexylcarbodiimide	
decreased sensitivity in mutants of <i>Saccharomyces cerevisiae</i>	105 (1979) 167
effect on photosynthetic electron flow	108 (1979) 136
-sensitive ATPase of <i>Escherichia coli</i>	104 (1979) 339
Diet, effect of fatty acids on energy transport in heart mitochondria	102 (1979) 173
Diethylaminoethyl-cellulose (DEAE-cellulose), immobilization of chloroplasts	101 (1979) 311
Differentiation	
effect of urea derivatives on neuroblastoma cells	104 (1979) 401
in murine erythroleukemic cells, effect of aliphatic carbonyl compounds	109 (1980) 264
in <i>Volvox carteri</i>	107 (1979) 241; 107 (1979) 247
Digitoxin hydroxylation in immobilized <i>Digitalis lanata</i> cells	103 (1979) 93
2,3-Dihydro-2,3-dihydroxy aflatoxin B ₁ , synthesis by rat liver microsomes in vitro	101 (1979) 382
7,8-Dihydrodiol 9,10-oxide benzo[a]pyrene, NMR study of binding to DNA	105 (1979) 77
2,3-Dihydrodolicetyl pyrophosphate	104 (1979) 379

Dihydrostreptomycin, study of ribosomal binding in <i>ram</i> mutants of <i>Escherichia coli</i>	104 (1979) 317
Dihydroxyacetone, effect on oxidation of palmitate in hepatocytes	103 (1979) 89
2,3-Dihydroxybenzoic acid	110 (1980) 271
effect on glyoxalase I	106 (1979) 393
1 α , 24-Dihydroxycalciferol, effect of hepatectomy on metabolism	104 (1979) 367
1,25-Dihydroxycholecalciferol, effect on calcium metabolism in vitamin D and calcium-deficient rats	107 (1979) 91
25,26-Dihydroxycholecalciferol	106 (1979) 162
7,8-Dihydroxy-7,8-dihydrobenzo[a]pyrene, effect of arachidonic acid on metabolism	106 (1979) 13; 106 (1979) 17
\pm <i>trans</i> -7 β ,8 α -Dihydroxy-9 α ,10 α -epoxy-7,8,9,10-tetrahydrobenzo[a]pyrene, effect on histones	108 (1979) 321
Dihydroxyfumaric acid, effect on glyoxalase I	106 (1979) 393
L-3,4-Dihydroxyphenylalanine (DOPA), incorporation into hamster melanoma melanosomes	104 (1979) 291
17,21-Dihydroxy-pregn-4-en-3,20-dione, <i>see</i> 11-Deoxycortisol	
9-(<i>S</i>)-(2,3-Dihydroxypropyl)adenine, effect on transformation of chick embryo fibroblasts infected with Rous sarcoma virus	108 (1979) 187
Diiodosulphophenylisothiocyanate, use in surface labelling of lymphocytes	108 (1979) 119
Dimethisoquin, effect of acetyl choline on α -bungarotoxin receptor binding	108 (1979) 356
Dimethylallylpyrophosphate: trihydroxy pterocarpan dimethylallyl transferase	101 (1979) 90
7-Dimethylamino-1,2-benzophenoxazinium chloride, <i>see</i> Meldolablue	
<i>p</i> -Dimethylaminoazobenzene binding to low density lipoproteins	104 (1979) 236
4- <i>N,N</i> -Dimethylaminoazobenzene 4'-thiohydantion (DABTH) amino acids, identification by liquid and thin-layer chromatography	108 (1979) 87
3'- <i>O</i> -(5-Dimethylaminonaphthoyl-1-)-ADP, interaction with oxidative phosphorylation and adenine nucleotide carrier	109 (1980) 197
Dimethylaniline oxidase, effect of phosphorylation of microsomal membranes	103 (1979) 260
4- <i>N,N</i> -Dimethylazobenzene 4'-isothiocyanate, use in amino acid sequence analysis	108 (1979) 92; 108 (1979) 98
Dimethyl 3,3'-dithiobispropionimide, effect on adenylate cyclase of bovine corpus luteum	104 (1979) 294
<i>N,N</i> -Dimethylformamide, EPR study of superoxide ion	103 (1979) 176
5-(<i>N</i> ⁵ -Dimethyl)glutamine analog, of substance P	108 (1979) 45
Dimethylsulfoxide, effect on <i>S</i> -adenosyl methionine synthetase	106 (1979) 25
Dimyristoylphosphatidyl choline	
interaction with apolipoprotein A-I	104 (1979) 231
transfer from liposomes to high density lipoproteins	105 (1979) 115
Dinucleotides, effect on RNA synthesis	106 (1979) 104
Dioxane, effect on enzymatic conjugation of benzo[a]pyrene 4,5-oxide with glutathione	101 (1979) 187
Dioxygenase of <i>Sporotrichum pulverulentum</i>	104 (1979) 258
Dipalmitoyllecithin analogs, study of modulation of phase transition	103 (1979) 181
Dipalmitoylphosphatidylcholine, study of lipid chain dynamics	109 (1980) 5
Dipeptides, effect on glycylsarcosine transport in scutellum of germinating barley grain	108 (1979) 447
1,3-Diphenylisobenzofuran, quenching of singlet oxygen	108 (1979) 152
Distearoylphosphatidylcholine, study of lipid chain dynamics	109 (1980) 5
Disuccinimidyl esters as bifunctional crosslinking reagents for proteins	102 (1979) 282
Disuccinimidyl β -hydromuconate, use in crosslinking of subunits of phosphofructokinase	105 (1979) 249
Dithiothreitol, reversal of methemoglobin blockade of guanylate cyclase activation by nitroso compounds	102 (1979) 316
Diuron, effect of proteolysis on inhibition of photosystem II	103 (1979) 22
Divalent cations	
effect on energy transfer between phycobilins and chlorophyll	107 (1979) 4
effect of proteolytic activity on adenylate cyclase	107 (1979) 105
DNA	
arrangement of nucleosomes in chromatin	107 (1979) 285
-binding protein S25 of rat liver	106 (1979) 292
-containing dUMP, formation in Bry-58 lysed CHO-cells	105 (1979) 127
-divalent cation interaction, NMR study	108 (1979) 439
effect of promotor modification on binding to RNA polymerase	102 (1979) 82
entrapment in large unilamellar phospholipid vesicles	101 (1979) 229
formation of malondialdehyde by bleomycin—iron free radical damage to DNA	105 (1979) 278
location of adenine units	108 (1979) 427
NMR-study of binding of 7,8-dihydrodiol 9,10-oxide benzo[a]pyrene	105 (1979) 77
of calf thymus, binding of diacridines	104 (1979) 261
of higher plants, study of bound proteins	110 (1980) 184
-polylysine complex, effect of bisulfite on conformation	107 (1979) 129

Erythrocytes	
exchange of cholesterol with lipid vesicles	103 (1979) 186
fusion with proteoliposomes	102 (1979) 230
purification of calmodulin	107 (1979) 209
study of hypoxanthine transport	107 (1979) 203
study of tubulin and its assembly promoting factors during development	107 (1979) 383
Erythroleukemic cells, effect of aliphatic carbonyl compound on erythroid differentiation	109 (1980) 264
Estradiol, binding by polyestradiol	107 (1979) 40
Ethanol	
effect on	
enzymatic conjugation of 1,2-dichloro-4-nitrobenzene with glutathione	101 (1979) 187
excretion of tetrahydroharmaline and hormone into the urine	109 (1980) 209
microsomal palmitoyl-CoA hydrolase activity	110 (1980) 205
oxidation of palmitate in hepatocytes	103 (1979) 89
reaction kinetics of glutathione S-transferase	102 (1979) 165
tyrosine aminotransferase	105 (1979) 205
treatment of rats, effect on glutathione disulfide release into bile	103 (1979) 287
7-Ethoxycoumarin dealkylation, in relation with cytochrome P-450 redox cycle at subzero temperature	102 (1979) 117
Ethoxyzolamide, study of photosynthetic CO ₂ fixation in <i>Chlorella vulgaris</i>	103 (1979) 221
N-Ethylmaleimide, effect on muscarinic receptor agonist binding	109 (1980) 81
Etorphine, stereospecific binding in human placenta	103 (1979) 362
Exonuclease	
III, effect on DNA-protein complexes	109 (1980) 159
<i>TthI</i> , of <i>Thermus thermophilus</i>	109 (1980) 156
FAD, effect on initiation of template-dependent RNA synthesis	102 (1979) 51
Fatty acid	
-binding peptide of rat liver cytoplasm	108 (1979) 469
effect of antiketogenic agents and pyruvate on oxidation	103 (1979) 89
oxidation	
of rat liver, effect of 2-mercaptoacetate	108 (1979) 465
regulation in peroxisomes	107 (1979) 81
synthesis	
effect of changes in ambient temperature	108 (1979) 33
in cold-acclimated rats	104 (1979) 13
in spinach chloroplasts, study of energy requirements	101 (1979) 339
regulation in hepatocytes by intestinal chylomicrons	106 (1979) 370
Fatty acids	
effect of diet on energy transport in mitochondria	102 (1979) 173
effect on action of lipoprotein lipase	106 (1979) 345
study of distribution in phosphatidylglycerol of cholesterol-requiring <i>Mycoplasma</i> sp.	107 (1979) 379
Fatty acyl CoA synthase, localisation on mitochondrial membranes	101 (1979) 262
Ferredoxin	
-dependent electron transport, role of cytochrome <i>f</i>	105 (1979) 365
-NADP-reductase of chloroplasts	101 (1979) 305
of <i>Mycobacterium smegmatis</i> , study of iron-sulfur centres	103 (1979) 224
reduction of <i>c</i> -550 and cytochrome <i>b₆</i> in the dark	102 (1979) 133
-thioredoxin reductase	107 (1979) 141
Ferritin	
analysis by gel filtration	104 (1979) 51
iron mobilisation by chelating agents	110 (1980) 271
isoelectric focusing profiles	105 (1979) 353

Ferric superoxide dismutases, distribution in blue-green algae	103 (1979) 106
Fibroblasts	
effect of 9(<i>S</i>)-(2,3-dihydroxypropyl)-adenine on transformation by Rous sarcoma virus	107 (1979) 187
effect of epidermal growth factor on accumulation of cyclic AMP in response to postaglandin E ₁	102 (1979) 329
effect of magnesium on serum activation of uridine transport	106 (1979) 149
presence of low density lipoprotein receptor	106 (1979) 129
transformation-associated increase of phosphoribosyl pyrophosphate	103 (1979) 43
Fibronectin	
–collagen interaction, effect of dextran sulfate	107 (1979) 51
-like protein, synthesis by mouse peritoneal macrophages	105 (1979) 313
synthesis in Schwann cells	102 (1979) 64
Fimbriae of <i>Escherichia coli</i> , properties of colonization factor CFA/1 protein	108 (1979) 107
Flagella of sea urchin sperm, characterization of dynein ATPase	106 (1979) 397
Fluorescamine	
effect on mitochondria in action on oxidative phosphorylation uncouplers	106 (1979) 226
labelling of membranes and reaction centers of <i>Rhodospirillum rubrum</i>	107 (1979) 409
Fluorescein multisubstituted polymer, use in fluoroimmunoassay	103 (1979) 339
Fluorescence	
polarization	
phase transition in dipalmitoyl lecithin analogs	103 (1979) 181
study of lipid membranes	108 (1979) 359
study of self-association of melittin and its binding to lipids	102 (1979) 187
spectroscopy	
of chlorophyll, effect of cations	103 (1979) 241
of neurotoxin II–acetylcholine receptor interaction	106 (1979) 47
Fluoroimmunoassay, use of multi-fluorescein-substituted polymers	103 (1979) 339
Folic acid, effect on cyclic AMP binding activity	109 (1980) 27
<i>N</i> -Formylkynurenine derivative of lysozyme, Raman spectroscopy study	106 (1979) 268
2'(3'- <i>O</i> -(<i>N</i> -Formyl-methionyl)adenosine 5'-phosphate (pA-fMet), use in peptide bond formation on ribosomes	101 (1979) 225
<i>N</i> -Formyl-methionyl–leucyl–phenylalanine, effect on phosphatidylinositol turnover in rabbit granulocytes	101 (1980) 125
<i>N</i> -Formyl-methionyl peptides, effect on oxygen consumption and superoxide anion production in macrophages	108 (1979) 47
Fructose	
effect on oxidation of palmitate in hepatocytes	103 (1979) 89
-1,6-bisphosphatase	
effect of fructose-1,6-bisphosphate and thioredoxin- <i>f</i>	109 (1980) 289
modification by periodate-oxidized AMP	102 (1979) 29
of <i>Saccharomyces cerevisiae</i> , effect of glucose	109 (1980) 271
Fumarate reductase, effect of tungstate in <i>Proteus mirabilis</i>	106 (1979) 43
L-Galactonate metabolism, in <i>Escherichia coli</i> K-12	103 (1979) 216
Galactose	
-lipid compounds in <i>Volvox carteri</i> F. <i>nagariensis</i>	106 (1979) 321
D-, requiring mutants in <i>Aspergillus nidulans</i>	104 (1979) 17
Galactosyldiacylglycerols, synthesis by chloroplast envelopes	102 (1979) 33
Ganglioside GM ₁ -containing vesicles, interaction with cholera toxin	106 (1979) 309
Gastric antisecretory glycoprotein	104 (1979) 393
GDP	
-binding polypeptide of brown adipose tissue mitochondria	101 (1979) 35
effect on adenylate cyclase	101 (1979) 85; 108 (1979) 365
measurement in isolated cells and mitochondria	105 (1979) 90
study of binding to elongation factor Tu	101 (1979) 153
thiophosphate analog, interaction with elongation factor Tu	102 (1979) 269
Gel	
chromatography, of ribosomal subunits	110 (1980) 177
electrophoresis	
of apolipoproteins	101 (1979) 21
of chlorophyll–protein complexes of <i>Phaseolus vulgaris</i>	104 (1979) 79
of nucleosomes of <i>Dictyostelium discoideum</i>	110 (1980) 236

FEBS LETTERS

filtration	
of equine ferritin subunits	104 (1979) 51
reconstitution of microsomal monooxygenase	104 (1979) 300
Gene <i>tufB</i> of <i>Escherichia coli</i> ligation with plasmid ColEI-Ap ^r	102 (1979) 207
Germination	
effect of dipeptides on glycylsarcosine transport in scutellum of barley grain	108 (1979) 447
study of purine metabolism in <i>Lupinus luteus</i>	104 (1979) 95
Glioma cells C6, effect of factors on enzyme activities of neuroblastoma hybrid cells	107 (1979) 37
Globin	
mRNA, translation in	
fused HeLa cells	109 (1980) 39
reticulocyte chromatin	105 (1979) 131
synthesis, effect of polydeoxythymidylate in a cell-free system	110 (1980) 333
Glomerular cultured cells, study of prostaglandin synthesis	104 (1979) 420
Glomeruli, characterization of collagenous polypeptides from basement membranes	106 (1979) 379
Glucagon	
antagonist	101 (1979) 191
effect on	
calcium transport in rat hepatocytes	104 (1979) 31
durohydroquinone oxidation in rat liver mitochondria	106 (1979) 330
mitochondrial metabolism in hepatocytes	101 (1979) 277
synthesis of phosphatidylcholines and phosphatidylethanolamines in hepatocytes	105 (1979) 27
1,4-Glucan-4-glucosyltransferase	105 (1979) 35
α -Glucan phosphorylase, study of active form of pyridoxal phosphate	101 (1979) 403
Gluconeogenesis, effect of ouabain and potassium removal on α -adrenergic stimulation	106 (1979) 189
D-Glucono- δ -lactone, effect on glyoxalase I	106 (1979) 393
O- β -D-Glucopyranosyl-9- β -D-ribofuranosylzeatin	107 (1979) 21
O- β -D-Glucopyranosylzeatin	107 (1979) 21
Glucose	
dehydrogenase, of <i>Acinetobacter calcoaceticus</i>	108 (1979) 443
1,6-diphosphatase, effect of fasting-refeeding treatment in dystrophic muscle	104 (1979) 244
effect on activity of fructose 1,6-bisphosphatase	109 (1980) 271
-induced insulin release, effect of calcium in rat islets of Langerhans	109 (1980) 213
-6-phosphate dehydrogenase	
mechanism of isoproterenol-induced stimulation	106 (1979) 335
of <i>Anacystis nidulans</i> , effect of bacteriophage AS-1	105 (1979) 158
transport	
in brush border membrane vesicles	108 (1979) 451
preservation after alkaline treatment in brush border membrane vesicles	105 (1979) 224
relation with sodium cotransport in brush border membranes	108 (1979) 205
Glucosidases, role in indole alkaloid biosynthesis of <i>Catharanthus roseus</i>	110 (1980) 187
D-Glucosiminate dehydratase, of <i>Agrobacterium radiobacter</i>	104 (1979) 131
β -1,2-Glucosyl transfer by membranes, of <i>Acetobacter xylinum</i>	107 (1979) 237
β -D-Glucuronidase, hydrolysis of α -L-iduronic acid-containing glycosaminoglycans	105 (1979) 123
Glutamate	
decarboxylase, effect of tricarboxylic acid cycle intermediates	105 (1979) 155
receptors, during development of rat cerebellum	109 (1980) 175
synthase, study of NADH-H ₂ O hydrogen exchange	108 (1979) 237
Glutaminase, properties of two mammalian species	107 (1979) 33
Glutamine synthetase, of barley (<i>Hordeum vulgare</i>), study of tissue localization	110 (1980) 265
γ -Glutamyl cycle	
kinetics of amino acid transport	110 (1980) 192
role in amino acid transport	105 (1979) 283; 108 (1979) 240
γ -Glutamyl transpeptidase, localization in rat kidney and jejunum	107 (1979) 436
Glutathione	
disulfide release into bile in ethanol-treated rats	103 (1979) 287
effect of glyoxalase I on photoaffinity labelled derivative	110 (1980) 262
NMR study of glycine incorporation in intact erythrocytes	106 (1979) 325
reductase study of histidine in C-terminal fragment	105 (1979) 244

relation with amino acid transport in yeast	105 (1979) 283
role of kidney in plasma concentration and redox state	109 (1979) 335
<i>S</i> -transferase	
effect of aprotic solvents	101 (1979) 187
effect of ethanol on reaction kinetics	102 (1979) 165
Glyceollins	101 (1979) 90
Glyceraldehyde-3-phosphate dehydrogenase	
NMR study by photo-CIDNP	107 (1979) 288
study of immobilized hybrids	107 (1979) 277
Glycerol	
effect on oxidation of palmitate in hepatocytes	103 (1979) 89
-3-phosphate acyltransferase, location on mitochondrial membranes	101 (1979) 262
Glycine incorporation into glutathione, of intact human erythrocytes	106 (1979) 325
<i>sn</i> -Glycerol-3-phosphate acyltransferase, of achloroplasic <i>Euglena gracilis</i>	102 (1979) 261
Glycogen	
debranching enzyme, of chicken pectoralis muscle	105 (1979) 35
presence of phosphate	109 (1980) 85
synthase	
effect of insulin in phosphorylase kinase deficient mice	105 (1979) 235
kinase, of rat liver	101 (1979) 347
study of phosphorylation	106 (1979) 181
relation between phosphorylation state and kinetic properties	106 (1979) 279; 106 (1979) 284
synthesis, in rat hepatocytes, effect of lithium	108 (1979) 197
Glycoprotein of human urine, with gastric antiseecretory activity	104 (1979) 393
β 2-Glycoprotein-I, binding to human serum lipoproteins	102 (1979) 183
Glycoproteins	
effect of retinylphosphate and dolichylphosphate on mannosylation	107 (1979) 375
of <i>Volvox carteri</i> cell membrane	104 (1979) 249
transport from hepatocytes into bile	106 (1979) 121
use of lectins in measurement in plasma or serum	109 (1980) 257
Glycosaminoglycans, interaction with lectin-2 of embryonic chick muscle	101 (1979) 257
Glycosphingolipids, distribution in human small intestine cells	101 (1979) 273
Glycosyltransferase, effect of polyprenyl phosphate on inactivation by detergents	108 (1979) 111
Glycosylated amino acids, NMR study	107 (1979) 26
Glycosylation of serum albumin	103 (1979) 282
<i>N</i> -Glycosylation of peptides in rat liver	109 (1979) 341
Glycyl–histidyl–lysine, effect on DNA synthesis	104 (1979) 119
Glycylsarcosine transport in scutellum of germinating barley, effect of dipeptides	108 (1979) 447
Glyoxylase I	
effect of <i>S</i> -(<i>p</i> -bromobenzyl) glutathione	102 (1979) 162
effect of transition-state analogs	106 (1979) 393
effect on photoaffinity labelled derivative of glutathione	110 (1980) 262
Glyoxylic acid cycle, effect of NADPH/NADP on isocitrate flux in <i>Escherichia coli</i>	105 (1979) 333
Goiter, effect of thyroid stimulating hormone and dibutyl cAMP on protein kinase	104 (1979) 21
Gonadotropin release by rat pituitary cells	104 (1979) 410
Guanine	
nucleotides, compartmentation in hepatocytes	107 (1979) 198
–uridine base pairs, NMR study	107 (1979) 125
Guanosine	
tetraphosphate (ppGpp), accumulation during nitrogen deprivation of <i>Anabaena cylindrica</i>	108 (1979) 173
5'- <i>O</i> -(2-thiodiphosphate) effect on GTP action of adenylate cyclase	109 (1980) 275
pentaphosphate (pppGpp), accumulation during nitrogen deprivation of <i>Anabaena cylindrica</i>	108 (1979) 173
Guanylate cyclase	
activation by nitroso compounds, effect of methemoglobin and dithiothreitol	102 (1979) 316
role of <i>S</i> -nitrosothiols in activation by nitroso compounds	110 (1980) 275
Gramicidin	
A, incorporation into lysolecithin micelles	102 (1979) 321
S, replacement of phenylalanine by other amino acids	103 (1979) 118
Grana formation, effect on electron transport in chloroplasts	106 (1979) 247

FEBS LETTERS

Granulocytes	
defects of cytochrome <i>b</i> in chronic granulomatous disease	110 (1980) 111
effect of calcium on phosphatidylinositol turnover	110 (1980) 115
Green fluorescent protein of <i>Aequorea</i> , structure of chromophore	104 (1979) 220
Growth	
-modulating plasma tripeptide, effect on DNA synthesis in hepatoma cells	104 (1979) 119
presence of ornithine decarboxylase in rapidly proliferating plant cells	104 (1979) 146
GTP	
effect of guanosine 5'- <i>O</i> -(2-thiodiphosphate) on adenylate cyclase	109 (1980) 275
effect on adenylate cyclase	101 (1979) 85, 107 (1979) 100
measurement in isolated cells and mitochondria	105 (1979) 90
Harmane, excretion into the urine after loading with ethanol	109 (1980) 209
Heart cells, interaction with phencyclidine analogs	103 (1979) 133
Heat	
production	
in adipocytes, relation between obese and normal weight individuals	101 (1979) 411
relation with obesity and diabetes	110 (1980) 8
study of inactivation of acetylcholine receptor protein	108 (1979) 489
Heavy meromyosin, aggregation with F-actin	105 (1979) 101
Hemagglutinin	
of Hong Kong influenza virus	110 (1980) 181
of influenza virus	108 (1979) 422
Heme	
<i>a</i> , study of resonance Raman spectroscopy	108 (1979) 147
<i>a</i> ₃ /copper, model for active site in cytochrome <i>c</i> oxidase	106 (1979) 265
oxygenase, study of stoichiometry	104 (1979) 45
Hemocyanin, of <i>Androctonus australis</i>	106 (1979) 289
Hemoglobin	
of trout, reconstitution with cobalt	105 (1979) 229
<i>see also</i> , Nitrosyl hemoglobins	
Hemoprotein—oxygen complexes, EPR study at low temperature	106 (1979) 213
Heparin	
interaction with platelet antiheparin proteins and antithrombin III	102 (1979) 75
—Sephacrose chromatography of lactoferrin	109 (1980) 180
Hepatectomy, effect on metabolism of 1 α ,24-dihydroxycalciferol	104 (1979) 367
Hepatitis B surface antigen-containing liposomes, study of immunogenicity	102 (1979) 107
Hepatocytes	
cell spreading effect of lysosomotropic amines	105 (1979) 345
compartmentation of guanine nucleotides	107 (1979) 198
effect of	
cholera toxin on adenylate cyclase	104 (1979) 359
glucagon on calcium transport	104 (1979) 31
glucagon on synthesis of phosphatidylcholines and phosphatidylethanolamines	105 (1979) 27
lithium on glycogen synthesis	108 (1979) 197
selenite on amino acid transport	107 (1979) 77
localisation of Na ⁺ ,K ⁺ -ATPase in surface membranes	108 (1979) 374
measurement of ATP, ADP, GTP and GDP	105 (1979) 90
of rat, activation of 3-hydroxy-3-methyl glutaryl CoA reductase in culture	109 (1980) 171
role of albumin in transport of thyroid hormones	107 (1979) 227
regulation of fatty acid synthesis by intestinal chylomicrons	106 (1979) 370
study of glucagon effects on mitochondrial metabolism	101 (1979) 277
study of insulin uptake	106 (1979) 338
synthesis of mitochondrial proteins	108 (1979) 167
transport of glycoproteins into bile	106 (1979) 121
Hepatoma cells, effect of	
dimethylsulfoxide on <i>S</i> -adenosylmethionine	106 (1979) 25
ochratoxin A and phenylalanine	104 (1979) 287
Hexane, study of rhodopsin—phosphatidyl choline complex formation	107 (1979) 213
Hexose transport, into rat liver lysosomes, effect of cations and pH	106 (1979) 145

High density lipoproteins (HDL)	
amino acid sequence of apolipoproteins	109 (1980) 43
effect of liver lipase antiserum	104 (1979) 384
effect on lipoprotein lipase	105 (1979) 53
–phospholipid complex	106 (1979) 169
study of micelle structure	104 (1979) 231
transfer of dimyristoylphosphatidylcholine from liposomes	105 (1979) 115
High performance liquid chromatography, of peptides	108 (1979) 81
Hill coefficient, calculation for allosteric enzyme reaction system	103 (1979) 5
Histamine	
formation from (2 <i>S</i>)-histidine by mammalian histidine decarboxylase	107 (1979) 231
release from rat peritoneal mast cells, effect of lysophosphatidylserine	105 (1979) 58
Histidine, formation of histamine by mammalian histidine decarboxylase	107 (1979) 231
Histidyl-tRNA of yeast mitochondria	108 (1979) 182
Histone	
H ₂ B protease, presence in snake venom phosphodiesterase	103 (1979) 352
H ₄ , enrichment in DNase I sensitive chromatin	110 (1980) 164
H ₄ , study of enzymatic deacetylation	106 (1979) 93
Histones	
ADP-ribosylation in calf thymus	110 (1980) 227
changes during bovine liver ontogeny	108 (1979) 327
effect of \pm <i>trans</i> -7 β ,8 α -dihydroxy-9 α ,10 α -epoxy-7,8,9,10 tetrahydrobenzo[a]pyrene	108 (1979) 321
reconstitution of nucleosome core particles	103 (1979) 126
Homogentisic acid, synthesis from 4-hydroxyphenylpyruvic acid in <i>Lemna gibba</i>	104 (1979) 332
Hong Kong influenza virus hemagglutinin	110 (1980) 181
Hormone	
action and proteases	106 (1979) 1
receptor–adenylate cyclase interactions	101 (1979) 213
Horseradish peroxidase compound I, study of heme iron-free radical interaction	103 (1979) 102
Human baby kidney virus, homology of replication origin with other viral DNAs	101 (1979) 359
Hydrogen	
formation, in cyanobacterium <i>Anabaena cylindrica</i> B629	101 (1979) 125
oxidation, linkage to ATP synthesis in chromatophores of <i>Rhodopseudomonas capsulata</i>	106 (1979) 29
peroxide, effect of detergent-solubilized thyroid peroxidase	109 (1980) 71
25-Hydroxycholecalciferol metabolism, regulation by parathyroid hormone in chick kidney cell cultures	105 (1979) 31
Hydroxycinnamic acid amides, role in reproduction of <i>Zea mays</i>	108 (1979) 176
Hydroxyl radical, production by tallsomycin and copper (II)	101 (1979) 333
Hydroxylamine, stable isotope study of oxidation from ammonia	106 (1979) 401
12 α -Hydroxylation, role of cytochrome <i>P</i> -450 in rabbit liver microsomes	106 (1979) 235
Hydroxylysine-deficient, collagen disease	110 (1980) 73
3-Hydroxy-3-methylglutaryl CoA reductase	
activation in hepatocytes	109 (1980) 171
effect of phosphorylation	110 (1980) 195
Hydroxyperoxides, study of reaction with superoxide	107 (1979) 403
4-Hydroxyphenylpyruvic acid, conversion to homogentisic acid in chloroplasts of <i>Lemna gibba</i>	104 (1979) 332
4-Hydroxypyrazole, effect on tryptophan oxygenase	101 (1979) 149
5-Hydroxytryptamine, binding to microsomal proteins	101 (1979) 59
5-Hydroxytryptophan metabolites, binding to microsomal proteins	101 (1979) 59
Hypertension, effect of peptide hormones on cardiac adenylate cyclase	107 (1979) 86
Hyperthermia, role of mitochondrial calcium	107 (1979) 265
Hypophysectomy, effect on sterol ester hydrolase of rat adrenal gland	102 (1979) 13
Hypothalamic mRNA, cell-free synthesis of neurophysin I and II	108 (1979) 311
Hypothalamus, study of precursors of vasopressin	108 (1979) 369
Hypoxanthine transport, in human erythrocytes	107 (1979) 203
Hypsorhodopsin, role in photochemical process of vision	106 (1979) 313
α -L-Iduronic acid-containing glycosaminoglycans, hydrolysis by β -D-glucuronidase	105 (1979) 123
Immobilized chloroplasts on diethylaminoethyl-cellulose	101 (1979) 311
Immobilized enzymes, study of glyceraldehyde-3-phosphate dehydrogenase hybrids	107 (1979) 277

FEBS LETTERS

Immobilized lysozyme, binding of <i>N</i> -acetylglucosamine and chitobiose at high temperature	108 (1979) 10
Immobilized plant cells, production and transformation of natural products	103 (1979) 93
Immobilized ribosomal 5.8 S RNA, binding of ribosomal proteins	104 (1979) 193
Immunoadjuvant, mass spectrometry of glycopeptide analogs	107 (1979) 254
Immuno-electrophoresis	
assay of NADH dehydrogenase	110 (1980) 279
of membrane vesicle and chromatophore immunogens of <i>Rhodopseudomonas sphaeroides</i>	107 (1979) 300
Immunogenicity of hepatitis B surface antigen-containing liposomes	102 (1979) 107
Immunoglobulin G-coated particles, effect of collagen	107 (1979) 69
Indole alkaloid	
biosynthesis of <i>Catharanthus roseus</i> , involvement of glucosidases	110 (1980) 187
synthesis in immobilized <i>Catharanthus roseus</i> cells	103 (1979) 93
Inflammation, measurement of acute phase proteins with use of lectins	109 (1980) 257
Influenza virus haemagglutinin	108 (1979) 422
Infrared spectroscopy (IR), of actin at G-F transition	109 (1980) 134
Inhibitor of protein synthesis, presence on ribosomes in resting human lymphocytes	102 (1979) 91
Initiation factor	
1 (IF-1)	101 (1979) 157
2 (eIF-2)	
control of protein synthesis	110 (1980) 1
of hypertrophying rat diaphragm	110 (1980) 173
3 (IF-3)	
binding to 30 S ribosomal subunit	108 (1979) 433
methylation with formaldehyde and sodium cyanoborohydride	101 (1979) 387
Inside-out chloroplast membranes, localization of water-splitting site of photosynthesis	105 (1979) 177
Inside-out mitochondrial membranes, study of oxidative phosphorylation	110 (1980) 96
Insulin	109 (1980) 167
effect of	
bradykinin in alloxan-diabetic rat	106 (1979) 125
calcium on glucose-induced release in rat islets of Langerhans	109 (1980) 213
colchicine and vinblastine on binding to and action in adipose cells	105 (1979) 329
effect on	
adrenaline-stimulated adenylate cyclase in rat adipose tissue	105 (1979) 19
glycogen synthase in phosphorylase kinase-deficient mice	105 (1979) 235
-immunoreactive components of pancreatic juice	105 (1979) 23
-like growth factors	109 (1980) 16
study of uptake into rat liver cells	106 (1979) 338
Interferon	
effect of hormones on double stranded RNA-induced cytolysis	101 (1979) 364
-inducing activity of lipopolysaccharide of <i>Pseudomonas aeruginosa</i>	105 (1979) 120
Intestine	
cells, distribution of glycosphingolipids	101 (1979) 273
relation between sucrase and isomaltase	108 (1979) 399
study of cholecalciferol-dependent protein synthesis	108 (1979) 17
Invertase	
distribution in rat small intestine	104 (1979) 35
-protein A monoconjugate use in enzyme immunoassays	107 (1979) 73
Iodination, study of phospholipid asymmetry in mixed liposomes	110 (1980) 69
<i>N</i> -Iodoacetyl- <i>N'</i> -(5-sulfo-1-naphthyl)-ethylenediamine, fluorimetric labelling of actin	109 (1980) 216
<i>p</i> -Iodophenylsulfonyl(pipsyl)chloride, modification of thyroxine-binding globulin	102 (1979) 306
Iodothyronine 5'-deiodinase, effect of thioureylenes	103 (1979) 314
Ionophore A23187, study of cation selectivity	105 (1979) 360
Ionophores, interaction with bacteriorhodopsin	101 (1979) 113
Iron	
accumulation by isolated rat liver mitochondria	105 (1979) 85
(II) enterobactin, role in iron transport in <i>Escherichia coli</i>	102 (1979) 325
mobilisation from ferritin from chelating agents	110 (1980) 271
-sulphur centre	
in photosystem I of <i>Phormidium laminosum</i>	107 (1979) 422

of ferredoxin of <i>Mycobacterium smegmatis</i>	103 (1979) 224
of NADH:Q oxidoreductase	104 (1979) 197
transport from transferrin to cultured rat fibroblasts	108 (1979) 127
Islets of Langerhans	
effect of calcium on glucose-induced insulin release	109 (1980) 213
properties of calmodulin	105 (1979) 95
<i>see also</i> , Pancreatic islets	
D-Isoascorbate, effect on glyoxalase I	106 (1979) 393
5'-Isobutylthioadenosine (SIBA), study on metabolism	104 (1979) 266
Isocitrate, effect of NADPH/NADP ratio on flux splitting between glyoxylic and tricarboxylic acid cycles in <i>Escherichia coli</i>	105 (1979) 333
Isoelectric focusing electrophoresis	
of chlorophyll–protein complexes of <i>Phaseolus vulgaris</i>	104 (1979) 71
of doxorubicin	101 (1979) 51
of ferritin	105 (1979) 353
of superoxide dismutase isoenzymes	108 (1979) 51
Isomaltase, relation with sucrase in human intestine	108 (1979) 399
<i>N</i> ⁶ -(Δ^2 -Isopentenyl)adenosine-5'-monophosphosphate, cell-free synthesis in system from tobacco tissue	107 (1979) 15
Isoproterenol, mechanism of stimulation of glucose-6-phosphate dehydrogenase	106 (1979) 335
Isotope effects of solvents, on tautomerization of papain	110 (1980) 313
Kethoxal, effect on guanine residue on 5 S rRNA	108 (1979) 181
Ketogenesis in liver, role of 3-oxo acid-CoA transferase	103 (1979) 212
Kidney	
role in glutathione concentration and redox state in plasma	108 (1979) 335
tubules, study of lactate and pyruvate metabolism	101 (1979) 282
Laccase–peroxide complex, EPR-study	108 (1979) 436
Lactate	
effect on oxidation of palmitate in hepatocytes	103 (1979) 89
metabolism in isolated human kidney tubules	101 (1979) 282
production in Ehrlich ascites tumour cells	104 (1979) 6
Lactation of mammary gland, study of acetyl-CoA carboxylase	103 (1979) 333
Lactoferrin	
binding of vanadyl at low pH	105 (1979) 349
isolation from human whey	109 (1980) 180
Lactoperoxidase, isolation procedure	110 (1980) 200
Lactoproteins, processing of precursors by microsomal membranes	101 (1979) 137
Lanthanides, effect on calcium transport in mitochondria	104 (1979) 352
Lecithin vesicles, study of phase transition enthalpy	102 (1979) 227
Lectin-2 of embryonic chick muscle, interaction with glycosaminoglycans	101 (1979) 257
Lectins	
location within membranes	102 (1979) 1
of <i>Vicia cracca</i>	102 (1979) 216
use in measurement of acute phase proteins in plasma or serum	109 (1980) 257
Leghemoglobin	108 (1979) 124
Leucine	
aminopeptidase of bovine eye lens, study of limited digestion	107 (1979) 366
transport in microvillar membrane vesicles, effect of chelating agents and phosphoramidon	101 (1979) 407
Leupeptin, effect on alkaline phosphatase isoenzyme conversions	105 (1979) 147
Light-harvesting	
antenna polypeptides of <i>Rhodospirillum rubrum</i> coding poly(A) mRNA	109 (1980) 31
chlorophyll <i>a/b</i> protein complex	101 (1979) 324
Light-induced EPR signals, in photosystem II at low temperature	101 (1979) 101
Light-scattering spectroscopy, of Lp(a) lipoprotein	106 (1979) 165
2'-5'-Linked oligoadenylic acid triphosphate, effect on nuclease in intact cells	105 (1979) 47
Linoleoyl-CoA desaturase of rat liver microsomes	104 (1979) 241
Lipase	
antisera, effect on low and high density lipoproteins	104 (1979) 384
<i>see also</i> , Colipase	

FEBS LETTERS

Lipid	
membranes, autocatalytic transport of suzukacillin and alamethicin	104 (1979) 157
of <i>Pseudomonas halosaccharolytica</i> , EPR-study	103 (1979) 192
vesicles, exchange of cholesterol with erythrocytes	103 (1979) 186
peroxidation, effect on bilayer phospholipid membranes	106 (1979) 53
peroxidation, effect on bilayer phospholipid membranes	106 (1979) 53
Lipopolysaccharide	
of <i>Arthrobacter</i> sp. RAG-1	101 (1979) 175
of bacteria, effect on plasma lipoproteins in 'non-responder' C3H/HeJ mice	104 (1979) 441
of <i>Pseudomonas aeruginosa</i>	105 (1979) 120
Lipoprotein	
changes induced by bacterial lipopolysaccharides in 'non-responder' C3H/HeJ mice	104 (1979) 441
-Lp(a), light-scattering spectroscopy study	106 (1979) 165
lipase	
association with very low density lipoproteins	105 (1979) 53
effect of apolipoprotein CII on hydrolysis of monoglycerides	106 (1979) 345
of rat brown fat	106 (1979) 115
of <i>Escherichia coli mlpA</i> mutant	109 (1980) 50
of human serum, binding of β_2 -glycoproteins	102 (1979) 183
see also, High density lipoproteins; Low density lipoproteins; Very low density lipoproteins	
Liposome membranes, permeation by superoxide radical	108 (1979) 477
Liposomes	
containing hepatitis B surface antigen, study of immunogenicity	102 (1979) 107
transport	
of dimyristoylphosphatidylcholine to high density lipoproteins	105 (1979) 115
of phosphatidylinositol from microsomes	107 (1979) 30
Lithium, effect on glycogen synthesis in rat hepatocytes	108 (1979) 197
Long-chain acyl-CoA hydrolase, study of reaction kinetics	109 (1980) 194
Low density lipoproteins (LDL)	
binding of the carcinogen <i>P</i> -dimethylaminoazobenzene	104 (1979) 236
effect of liver lipase antiserum	104 (1979) 384
occurrence in cholestatic rat plasma	109 (1980) 164
receptor in chinese hamster fibroblasts	106 (1979) 129
study of liquid crystals of cholesterol esters	107 (1979) 222
Low molecular weight RNA, of hamster mitochondria	109 (1980) 223
Low temperature	
cytochrome <i>P</i> -450 redox cycle in relation with dealkylation of 7-ethoxycoumarin	102 (1979) 117
effect on phycobilisome-thylakoid membrane attachment	104 (1979) 327
fatty acid synthesis in cold-acclimated rats	104 (1979) 13
light-induced EPR signals in photosystem II	101 (1979) 101
photoreaction of <i>trans</i> -bacteriorhodopsin	101 (1979) 121
regulation of excitation transfer by cations in pea chloroplasts	104 (1979) 223
relation between electron transport and proton gradient in chloroplasts	103 (1979) 250
relation between protoplast plasmalemma fluidity and frost resistance	107 (1979) 291
study of fluorescence decay and energy transfer of photosystems I and II	102 (1979) 139
study of oxygen-hemoprotein complexes	106 (1979) 213
Lymphocytes	
cell surface labelling by diiodosulphophenylisothiocyanate	108 (1979) 119
presence of inhibitor of protein synthesis on ribosomes	102 (1979) 91
presence of lysosomal enzymes	104 (1979) 161
Lysolecithin micelles, incorporation of gramicidin A	102 (1979) 321
Lysophosphatidylserine, effect on histamine release from rat peritoneal mast cells	105 (1979) 58
Lysosomal enzymes, presence in lymphocytes	104 (1979) 161
Lysosome	
inclusion in phagocytic vesicles of polymorphonuclear leukocytes	106 (1979) 171
membranes, study of ATP-dependent proton transport	107 (1979) 113
Lysosomotropic amines, effect on hepatocyte cell spreading	105 (1979) 345
Lysozyme	
binding of <i>N</i> -acetylglucosamine and chitobiose in solid state at high temperature	108 (1979) 10
<i>N</i> -formylkynurenine derivative, Raman spectroscopy study	106 (1979) 268

Lysylhydroxylase, deficiency in connective tissue disease	110 (1980) 73
Lytic enzyme, of bacteriophage $\phi 6$	103 (1979) 234
Macrophages	
effect of <i>N</i> -formylmethionyl peptides	108 (1979) 47
synthesis of cold insoluble globulin	105 (1979) 313
Magnesium	
-DNA interaction, NMR-study	108 (1979) 439
effect on	
lactate production in Ehrlich ascites tumour cells	104 (1979) 6
pyruvate kinase activity	101 (1979) 287
serum activation of uridine transport into hamster fibroblasts	106 (1979) 149
interaction with tRNA-derived unusual nucleoside, $t^6 A$	106 (1979) 63
Magnetic	
field, effect on reaction centers of photosynthetic bacteria	110 (1980) 129
polymers, use in targeting of drugs	102 (1979) 112
Major cell surface glycoproteins, of normal and diabetic rat liver membranes	104 (1979) 389
Malonaldehyde, emission of singlet oxygen during peroxidase-catalyzed oxidation	108 (1979) 266
Malondialdehyde, formation by bleomycin-iron free radical damage to DNA	105 (1979) 278
Malonyl-CoA, effect on calcium transport and NAD/NADH state in mitochondria	101 (1979) 63
Maltol, effect on glyoxylase I	106 (1979) 393
Mammary gland	
acini, effect of citrate on phosphofructokinase	108 (1979) 193
of rat, phosphorylation of ATP-citrate lyase	109 (1980) 205
study of acetyl-CoA carboxylase	103 (1979) 333
Mammary tumors, properties of cyclic AMP-dependent protein kinase	106 (1979) 301
Manganese	
-binding to citrate lyase	105 (1979) 267
(II) coenzyme A, NMR study of conformation	105 (1979) 81
effect on acetylcholine-stimulated turnover of phosphatidylinositol in synaptosomes	108 (1979) 279
interaction with tRNA-derived unusual nucleoside, $t^6 A$	106 (1979) 63
presence in light-harvesting chlorophyll <i>a/b</i> protein complex	101 (1979) 324
oxidation, in lettuce chloroplasts, an ESR-study	104 (1979) 335
superoxide dismutases, distribution in blue-green algae	103 (1979) 106
Mannose	
-like receptors of polymorphonuclear leukocytes, role in phagocytosis of <i>Escherichia coli</i>	105 (1979) 307
-lipid compounds, in <i>Volvox carteri</i> F. <i>nagariensis</i>	106 (1979) 321
α -Mannosidase decrease of thermostability in cystic fibrosis	104 (1979) 271
Mannosylation of glycoproteins, effect of retinylphosphate and dolichylphosphate	107 (1979) 375
Mass spectrometry	
of cytokinins	107 (1979) 21
of synthetic glycopeptide analogs	107 (1979) 254
of tetrahydroharmaline and harmaline	109 (1980) 209
structure of tetrasialoganglioside of human brain	110 (1980) 80
Mast cells	
of rat peritoneum	
effect of lysophosphatidyl serine on histamine release	105 (1979) 58
properties of carboxypeptidase	110 (1980) 292
origin of proteinases in rat liver mitochondria	103 (1979) 168
Meiosis, effect of protein factors of mitotic CHO cells	109 (1980) 233
Melanosomes of hamster melanoma, incorporation of 3,4-dihydroxyphenylalanine	104 (1979) 291
Meldolablu, a substitute for phenazine methosulphate in staining isozymes after electrophoresis	105 (1979) 376
Melitin, study of self-association and binding to lipids	102 (1979) 187; 102 (1979) 191
Membrane	
antigen thy-1, heterogeneity in mouse thymocytes	108 (1979) 116
filters, proton-transport after phospholipid impregnation	110 (1980) 62
fusion activity in model systems	106 (1979) 176
lipid fluidity, study of Arrhenius discontinuities of Ca^{2+} -ATPase	107 (1979) 110
-mediated regulation of differentiation in <i>Volvox carteri</i>	107 (1979) 247

FEBS LETTERS

potential	
determination in bacterial membrane vesicles from the accumulation of <i>N</i> -methyldeptropine	105 (1979) 171
during chemotaxis of <i>Rhodopseudomonas sphaeroides</i>	102 (1979) 143
effect of phosphorylation of microsomal membranes	103 (1979) 260

 - of yeast breakdown by mitochondrial proteinase 101 (1979) 355
 - synthesis in rat hepatocytes 108 (1979) 167
 - synthesis of carbamoylphosphate synthetase I on extramitochondrial ribosomes 102 (1979) 43
- Mitosis, effect of protein factors of CHO cells on meiotic maturation in *Xenopus laevis* oocytes 109 (1980) 233
- Modulator protein, *see* Calmodulin

FEBS LETTERS

Molybdenum, presence in chlorate reductase and tetrathionate reductase	106 (1979) 43
Monoacylglycerol hydrolase, of human platelets	106 (1979) 111
Monoclonal	
antibodies, against acetylcholine receptor determinants	106 (1979) 389
anti-I and anti-i antibodies, recognition of oligosaccharide analogs	104 (1979) 135
Monocytes, effect of protease inhibitors on superoxide production	107 (1979) 331
Monoglycerides, effect of apolipoprotein CII on action of lipoprotein lipase	106 (1979) 345
Monooxygenase	
activity of <i>Candida tropicalis</i> , reconstitution in vitro	105 (1979) 143
reconstitution during gel filtration	104 (1979) 300
Monovalent cations, effect on energy transfer between phycobilins and chlorophyll	107 (1979) 4
Mössbauer spectroscopy, of horseradish peroxidase study of heme iron—radical interaction	103 (1979) 102
Mouse	
embryonal carcinoma cells, assay of actin pools	110 (1980) 305
L cells, binding properties of colchicine	107 (1979) 48
L-929 cells, characterization of poly(I)—poly(C)-induced interferon	109 (1980) 137
Leydig cells, relation between cyclic AMP, protein kinase activation and testosterone synthesis	107 (1979) 398
3T3 cells, identification of epidermal growth factor receptor	104 (1979) 415
polyoma virus DNA, homology of replication origin with other viral DNAs	101 (1979) 359
Murein-bound lipoprotein, of <i>Escherichia coli mlpA</i> mutant	109 (1980) 50
Murexide, interference of cytochromes in the measurement of calcium	109 (1980) 93
Muscarinic receptor	
agonist, effect of <i>N</i> -ethyl maleimide in rat and bovine brain membranes	109 (1980) 81
in rat cerebellum	104 (1979) 437
-mediated regulation of cyclic GMP in adrenal medulla	105 (1979) 296
role of phencyclidines as agonists	103 (1979) 133
Muscle	
atrophy, study of nucleic acid content and ribonuclease activity	108 (1979) 185
cells, study of myoblast fusion and appearance of acetylcholine receptors	103 (1979) 33
hypertrophy, study of initiation factor eIF-2	110 (1980) 173
myofibrillar protein patterns of single fibres	103 (1979) 152
study of acetylcholinesterase during development	109 (1980) 9
Muscular dystrophy, changes in glucose 1,6-diphosphate by fasting—refeeding treatment	104 (1979) 244
Mutant	
<i>crr</i> of <i>Escherichia coli</i> , role in inducer exclusion	104 (1979) 313
DL 54 of <i>Escherichia coli</i> , properties of coupling factor F_1	109 (1980) 104
<i>envC</i> of <i>Escherichia coli</i> , effect of phospholipase A on phospholipid vesicles	108 (1979) 261
<i>mit</i> ⁻ of <i>oli</i> 2 region, of mitochondrial DNA in <i>Saccharomyces cerevisiae</i>	108 (1979) 501
<i>mlpA</i> of <i>Escherichia coli</i> , characterization of murein-bound lipoprotein	109 (1980) 50
<i>pgm</i> of <i>Aspergillus nidulans</i> , lack of phosphoglucosyltransferase	104 (1979) 17
<i>ptsH</i> of <i>Escherichia coli</i>	107 (1979) 169
<i>ram</i> of <i>Escherichia coli</i> , study of dihydrostreptomycin binding to ribosomes	104 (1979) 317
<i>tgs</i> of <i>Escherichia coli</i> , role in catabolite inhibition	104 (1979) 313
with defective ATPase of <i>Escherichia coli</i> , study of proteolipid of ATPase	109 (1980) 107
Mutants OLIII of <i>Saccharomyces cerevisiae</i> , modified subunit of mitochondrial ATPase	105 (1979) 167
Myoblast fusion and appearance of acetylcholine receptors in muscle cultures	103 (1979) 33
Myofibrillar proteins, of single fibres from human muscle	103 (1979) 152
Myosin	
CD-study of interaction with ADP	105 (1979) 197
effect of thyroidectomy in rat muscle	110 (1980) 230
heavy chain mRNA	109 (1980) 239
isoenzymes	106 (1979) 81
effect of triiodothyronine on synthesis	101 (1979) 143
light chain LC ₁ , comparison between bovine ventricle and atrium	106 (1979) 207
subfragment-1, comparison between bovine, porcine and human heart	106 (1979) 157
use of disuccinimidyl esters as bifunctional crosslinking reagents	102 (1979) 282
Myosins, fractionation by affinity chromatography	106 (1979) 197
NAD	
conformation in neutral aqueous solutions	106 (1979) 132

effect on initiation of template-dependent RNA synthesis	102 (1979) 51
glycohydrolase, properties of membrane-bound and hydrosoluble forms	109 (1980) 247
/NADH state, effect of malonyl-CoA in mitochondria	101 (1979) 63
NADH	
dehydrogenase, content of bovine heart mitochondria and submitochondrial particles	110 (1980) 279
effect of cations on oxidation in mitochondrial membranes	108 (1979) 28
–H ₂ O hydrogen exchange of glutamate synthase	108 (1979) 237
Q oxidoreductase, study of iron–sulfur centres	104 (1979) 197
NAD(P)-dependent alcohol dehydrogenase	101 (1979) 179
NAD(P)H-quinone oxidoreductase intracellular quinone reduction	108 (1979) 229
–cytochrome <i>c</i> reductase, effect of salt in cyanobacteria	110 (1980) 253
/NADP ratio, effect on isocitrate flux splitting between glyoxylic and tricarboxylic acid cycles in <i>Escherichia coli</i>	105 (1979) 333
transformation of protochlorophyll(ide)–protein complex: <i>P</i> -649–642 to <i>P</i> -657–650	103 (1979) 345
Nanomelia, levels of 3',5'-cyclic AMP in chondrocytes	108 (1979) 353
Neuraminidase deficiency in the mouse	109 (1979) 345
Neuroblastoma cells	
effect of glial cell factors on enzyme activities	107 (1979) 37
effect of urea derivatives on differentiation	104 (1979) 401
Neurofilament polypeptides	
isolation from brain white matter	103 (1979) 148
of axons of bovine brain, study of heterogeneity	103 (1979) 144
relation with heart Purkinje fibre skeleton	102 (1979) 177
Neurophysins	
I and II, cell-free synthesis by bovine hypothalamic mRNA	108 (1979) 311
identification in human pituitary gland	101 (1979) 391
Neurotoxin	
α-, interaction with acetylcholine receptor after spin-labelling	110 (1980) 301
II, study of interaction with acetylcholine receptor	106 (1979) 47
Neurotransmitter receptor–adenylate cyclase interactions	101 (1979) 213
Neutron scattering	
of bacteriophage Pf ₁ and fd	108 (1979) 61
of <i>Escherichia coli</i> BF ₁ –ATPase	102 (1979) 244
of high density lipoproteins	104 (1979) 231
Nerve growth factor, of guinea pig prostate and mouse submandibular gland	105 (1979) 341
Nervous system, presence of collagen	106 (1979) 305
Nicotinic receptor, effect of phenylcyclidines	109 (1980) 125
Nitrate	
effect on 6-phosphogluconate dehydrogenase in pea roots	105 (1979) 370
reductase, effect of tungstate in <i>Proteus mirabilis</i>	106 (1979) 43
2-Nitro-4-azidobenzoic acid labelled phenylalanyl-tRNA, use in affinity labelling of ribosomes	102 (1979) 273
Nitrogen	
deprivation, accumulation of ppGpp and pppGpp in <i>Anabaena cylindrica</i>	108 (1979) 173
fixation by <i>Rhizobium leguminosarum</i> , role of membrane potential	103 (1979) 328
Nitrogenase	
effect of pH on coupling of ATP hydrolysis to substrate reduction	110 (1980) 35
NMR-study of protein binding	101 (1979) 31
Nitroso-compounds	
activation of guanylate cyclase, effect of methemoglobin and dithiothreitol	102 (1979) 316
role of <i>S</i> -nitrosothiols in activation of guanylate cyclase	110 (1980) 275
<i>S</i> -Nitrosothiols, role in guanylate cyclase activation by nitroso compounds	110 (1980) 275
Nitrosyl hemoglobins, ESR-study	106 (1979) 219
Non-histone chromosomal protein	
kinase, association with nucleosomes of HeLa S ₃ cells	106 (1979) 56
of trout liver	109 (1980) 294
phosphorylation by ATP–GTP-type protein kinase	107 (1979) 193
Nonidet P ₄₀ , effect of polyprenyl phosphate on inactivation of glycosyltransferase	108 (1979) 111
Non-structural protein of Semliki forest virus, association with ribosomes	108 (1979) 299
<i>N'</i> -(<i>N'</i> - <i>n</i> -Nonyl-4-sulfamoylphenyl)-maleimide, use in study ATPase complexes	109 (1980) 280
Novikoff rat ascites hepatoma DNA, effect of endonuclease <i>Hind</i> III	102 (1979) 46

FEBS LETTERS

Nuclear magnetic resonance (NMR)	
bilayer stability of erythrocyte membranes	107 (1979) 323
interaction of clupeine with polynucleotides	110 (1980) 21
of <i>Alternaria mali</i> toxin II	105 (1979) 337
of calcium-binding proteins	104 (1979) 123
of chromium(III)–cytochrome <i>c</i> complex	107 (1979) 427
of 7,8-dihydrodiol 9,10-oxide benzo[a]pyrene binding to DNA	105 (1979) 77
of DNA–divalent cation interaction	108 (1979) 439
of glyceraldehyde-3-phosphate dehydrogenase by photo-CIDNP	107 (1979) 288
of glycine incorporation into glutathione of erythrocytes	106 (1979) 325
of glycosylated amino acids	107 (1979) 26
of gramicidin A incorporation into lysolecithin micelles	102 (1979) 321
of guanine–uridine base pairs	107 (1979) 125
of ionophore A23187–metal complexes	105 (1979) 360
of phospholipid and sphingomyelin membranes	104 (1979) 173
of phospholipid membranes of <i>Acholeplasma laidlawii</i>	109 (1980) 5
of protein binding	101 (1979) 31
of pyridoxal-5'-phosphate in potato phosphorylase	108 (1979) 209
of urocanase	110 (1980) 126
sodium binding to parvalbumin	105 (1979) 384
study of chemical shift to hydrogen bonding	105 (1979) 11
study of conformation of manganese(II) coenzyme A	105 (1979) 81
study of protein structures	110 (1980) 133
Nuclear protein H1°	110 (1980) 25
Nuclear RNA, effect of 5-bromodeoxyuridine	108 (1979) 505
Nuclease	
activation in intact cells by 2'–5'-linked oligoadenylic acid triphosphate	105 (1979) 47
S1, cleavage of terminal protein from adenovirus 5 DNA	107 (1979) 355
Nuclei of tobacco tissues, study of RNA synthesis	101 (1979) 369
Nucleic acid, content in muscle atrophy	108 (1979) 185
Nucleoli of <i>Dictyostelium discoideum</i> , structure of chromatin	106 (1979) 363
Nucleoside	
diphosphates, effect on phosphoenolpyruvate carboxylase	109 (1980) 202
monophosphates, effect on phosphoenolpyruvate carboxylase	109 (1980) 202
transport into cells, effect of 5'-deoxy-5'- <i>S</i> -isobutyl thioadenosine (SIBA)	101 (1979) 233
Nucleosomal DNA, enrichment of tRNA genes by reversed phase chromatography	105 (1979) 254
Nucleosome core particles, reconstitution with histones from different species	103 (1979) 126
Nucleosomes	
arrangement on DNA in chromatin	107 (1979) 285
of <i>Dictyostelium discoideum</i> , gel electrophoretic isolation	110 (1980) 236
of HeLa S ₃ cells, association of nonhistone chromosomal protein kinase	106 (1979) 56
5'-Nucleotidase	
effect of concanavalin A on interaction with actin	103 (1979) 77
effect on 8,5'-cycloadenosine isomers	107 (1979) 363
relation with adenylate cyclase in mouse thymocytes	110 (1980) 30
Nucleotide	
analogs, photophosphorylation by chloroplasts	106 (1979) 251
carrier, occurrence in ATPase preparations	109 (1980) 280
sequence analysis determination of adenine units location in DNA	108 (1979) 427
Obesity	
difference from normal weight individuals of heat production by adipocytes	101 (1979) 411
relation with diabetes and heat production	110 (1980) 8
Ochratoxin A, effect on hepatoma cells	104 (1979) 287
Oligo d(A–T), NMR-study of interaction with clupeine	110 (1980) 21
Oligomycin-sensitive ATPase, study of participating proteins	109 (1980) 280
Oligosaccharide analogs, recognition by monoclonal anti-I and anti-i antibodies	104 (1979) 135
Ontogeny, <i>see</i> Development	
Optic tectum, acetylcholinesterase species in chicken	110 (1980) 91

Ornithine decarboxylase	
osmotically-induced modification in <i>Physarum polycephalum</i>	102 (1979) 265
presence in rapidly proliferating plant cells	104 (1979) 146
L-Ornithine: α -ketoglutarate δ -aminotransferase of <i>Bacillus sphaericus</i>	105 (1979) 209
Oscillations in cation transport, effect of antioxidants in mitochondria	107 (1979) 151
Osmium, binding to the isopentenyl adenosine residue of tyrosyl-tRNA	103 (1979) 300
Osteogenesis imperfecta, study of collagen metabolism in skin fibroblasts	101 (1979) 269
Ouabain, effect on α -adrenergic stimulation of gluconeogenesis	106 (1979) 189
Outer membrane	
of <i>Escherichia coli</i> , presence of proteolytic activity	102 (1979) 291
permeability of Gram-negative bacteria	106 (1979) 85
Outer surface proteins, of human erythrocytes	101 (1979) 43
Oxidative phosphorylation	
effect of acetylenedicarboxylic acid dimethylester	108 (1979) 171
in mitochondrial inside-out membranes	110 (1980) 96
interaction with fluorescent 3'-ADP-analog	109 (1980) 197
role of ATP- and ADP-binding sites in mitochondrial coupling factor F ₁	103 (1979) 7
uncouplers, effect of fluoescamine on mitochondria	106 (1979) 226
3-Oxo acid CoA transferase, role in regulation of ketogenesis in liver	103 (1979) 212
Oxygen	
binding to cytochrome <i>o</i> of <i>Escherichia coli</i>	101 (1979) 56
consumption, in lung macrophages, effect of <i>N</i> -formylmethionyl peptides	108 (1979) 47
–hemoprotein complexes, EPR-study at low temperature	106 (1979) 213
formation in membrane preparations of <i>Anacystis nidulans</i> effect of calcium	103 (1979) 114
generation of activated species by polymorphonuclear leukocytes	110 (1980) 283
singlet, effect of pigments and phospholipids on photosensitization and quenching	108 (1979) 152
study of formation in photosynthesis	110 (1980) 57
Oxymethylphenylacetamidomethyl-linkage, use in solid-phase Edman degradation	106 (1979) 89
Ozone oxidation, formation of <i>N</i> -formylkynurenine derivatives of lysozyme	106 (1979) 268
Pactamycin	
effect on mRNA for phosphoenolpyruvate carboxykinase	109 (1980) 112
effect on ribosomal RNA synthesis	107 (1979) 281
Palmitoyl	
-L-carnitine hydrolysis, subcellular localization in human and rat liver	104 (1979) 297
-CoA hydrolase	
effect of ethanol on activity	110 (1980) 205
study of reaction kinetics	109 (1980) 194
Pancreatic	
cells, effect of methylxanthines on calcium distribution	103 (1979) 348
islets	
effect of trace metals on alloxan cytotoxicity	105 (1979) 15
presence of bicarbonate-activated ATPase	105 (1979) 40
<i>see also</i> , Islets of Langerhans	
juice, characterization of immunoreactive components of insulin and somatostatin	105 (1979) 23
polypeptide	109 (1980) 167
Papain	
role of thiolate–imidazolium ion pair	110 (1980) 319
solvent isotope effects on tautomerization	110 (1980) 313
Papova virus DNA, homology of replication origin with other viral DNAs	101 (1979) 359
Parathyroid hormone, regulation of 25-hydroxycholecalciferol metabolism in chick kidney cell cultures	105 (1979) 31
Parotid gland, study of carbonic anhydrase	105 (1979) 299
Parvalbumin, NMR-study of sodium binding	105 (1979) 384
Penicillin-binding protein 1b of <i>Escherichia coli</i> K12, effect on peptidoglycan polymerization	110 (1980) 245
Penicillinase containing <i>Escherichia coli</i> plasmid, presence in yeast strains	108 (1979) 179
Peptidase, distribution in rat small intestine	104 (1979) 35
Peptide hormones, effect on cardiac adenylate cyclase in hypertensive rats	107 (1979) 86
Peptides	
alkali stability of <i>o</i> -phosphoserine and <i>o</i> -phosphothreonine esters	110 (1980) 308

FEBS LETTERS

of adrenal medulla chromaffin granule	107 (1979) 393
structural requirement for <i>N</i> -glycosylation in rat liver	109 (1979) 341
Peptidoglycan	
derivatives, mass spectrometry study	107 (1979) 254
of <i>Escherichia coli</i> K-12, study of biosynthesis	110 (1980) 241
polymerization, effect of penicillin binding protein	110 (1980) 245
synthesis	
in cell membranes of <i>Bacillus megaterium</i> , study of transpeptidation	101 (1979) 244
in <i>Micrococcus luteus</i> , effect of deoxycholate	105 (1979) 151
Peptidyltransferase	
center of ribosomes, study of donor site binding	102 (1979) 198
donor site of <i>Escherichia coli</i> ribosomes	104 (1979) 279
of <i>Escherichia coli</i> ribosomes, study of photoinactivation	102 (1979) 277
Peroxidase	
emission of singlet oxygen during oxidation of malonaldehyde	108 (1979) 266
of thyroid, effect on hydrogen peroxide after detergent solubilization	109 (1980) 71
Peroxisomes, regulation of fatty acid oxidation	107 (1979) 81
Petite mutant of yeast, origin of replication in the mitochondrial genome	108 (1979) 429
pH, effect on	
coupling of ATP hydrolysis to substrate reduction in nitrogenase	110 (1980) 35
energy transfer between phycobilins and chlorophyll	107 (1979) 4
hexose transport into rat liver lysosomes	106 (1979) 145
Phagocytic vesicles, study of formation in polymorphonuclear leukocytes	106 (1979) 171
Phagocytosis of <i>Escherichia coli</i> , by polymorphonuclear leukocytes, role of mannose-like receptors	105 (1979) 307
Phase transition enthalpy, of lecithin vesicles	102 (1979) 227
Phenazine methosulphate, use of Meldolabblue in staining isozymes after electrophoresis	105 (1979) 376
Phencyclidine	
analogs, interaction with heart cells	103 (1979) 133
effect on <i>Torpedo</i> electric organ membranes	109 (1980) 125
Phenobarbital-pretreated rats, study of ¹⁴ CO ₂ exhalation from [dimethylamino- ¹⁴ C]aminopyrine	103 (1979) 366
Phenylalanine	
ammonia lyases, induction in <i>Petroselinum hortense</i>	107 (1979) 233
effect on ochratoxin A action on hepatoma cells	104 (1979) 287
preparation of deuteriated derivatives	101 (1979) 329
Phenylalanyl-tRNA	
<i>N</i> -acylated by 2-nitro-4-azidobenzoic acid, use in affinity labelling of ribosomes	102 (1979) 273
synthetase, of <i>Escherichia coli</i> MRE-600	109 (1980) 13
Phenylheptatriyne, photoeffect on erythrocyte enzymes	107 (1979) 134
Phosphate	
-binding proteins of <i>Candida tropicalis</i>	105 (1979) 163
occurrence in glycogen	109 (1980) 85
release, effect of dynein ATPase of <i>Tetrahymena</i> cilia	108 (1979) 215
role in calcium transport in mitochondria	106 (1979) 231
transport	
in liver mitochondria, effect of inhibitor during calcium and strontium accumulation	107 (1979) 205
in yeast mitochondria, effect of tribenzylphosphate	102 (1979) 18
relation with ATP hydrolysis in liver mitochondria	102 (1979) 301
Phosphatidate phosphohydrolase, of chloroplast envelope membranes	102 (1979) 147
Phosphatidyl-	
choline	
effect on phosphatidylinositol transport from microsomes to liposomes	107 (1979) 30
-rhodopsin complex in hexane	107 (1979) 213
synthesis in rat hepatocytes, effect of glucagon	105 (1979) 27
ethanolamine synthesis in rat hepatocytes, effect of glucagon	105 (1979) 27
glycerol	
of cholesterol-requiring <i>Mycoplasma</i> sp., study of distribution of fatty acids	107 (1979) 379
role in light reactions of photosynthesis	106 (1979) 414
inositol	

effect of calcium in rabbit granulocytes	110 (1980) 115
transport from microsomes to liposomes	107 (1979) 30
turnover	
effect of manganese(II) on acetylcholine stimulation	108 (1979) 279
in rat parotid glands, requirement of sodium	102 (1979) 4
serine transport protein of rat liver	104 (1979) 253
Phosphodiesterase, of snake venom, presence of histone H2B protease	103 (1979) 352
Phosphoenolpyruvate	
carboxykinase (GTP), effect of cycloheximide and packamycin on mRNA	109 (1980) 112
carboxylase, of <i>Acinetobacter calcoaceticus</i> effect of nucleotides on activity	109 (1980) 202
Phosphofructokinase	
effect of citrate in mammary gland acini	108 (1979) 193
effect of fasting–refeeding treatment in dystrophic muscle	104 (1979) 244
F ₄ , study of kinetic properties	110 (1980) 219
of yeast, study of quaternary structure	105 (1979) 249
Phosphoglucomutase	
effect of fasting–refeeding treatment in dystrophic muscle	104 (1979) 244
lacking mutants of <i>Aspergillus nidulans</i>	104 (1979) 17
6-Phosphogluconate dehydrogenase, of pea roots, effect of nitrate	105 (1979) 370
Phosphoglycerate	
kinase, conformation study	106 (1979) 239
mutase, of rabbit muscle	109 (1980) 18
Phospholipase	
A, effect on phospholipid vesicles in mutant <i>envC</i> of <i>Escherichia coli</i>	108 (1979) 261
A ₂ , effect of treatment of chloroplasts on photosynthesis	106 (1979) 414
Phospholipid	
–high density lipoprotein complex	106 (1979) 169
membrane vesicles, entrapment of high molecular weight DNA	101 (1979) 229
membranes	
effect of phospholipase A in mutant <i>envC</i> of <i>Escherichia coli</i>	108 (1979) 261
effect of ultraviolet irradiation-induced lipid peroxidation	106 (1979) 53
reconstitution of reaction centers of <i>Rhodospseudomonas sphaeroides</i>	110 (1980) 101
study of asymmetry in liposomes by radio-iodination	110 (1980) 69
study of lipid chain dynamics	109 (1980) 5
study of orientational order	104 (1979) 173
study of proton transport	110 (1980) 62
transfer protein	107 (1979) 30
vesicles containing trypsin and fluorogenic substrate	106 (1979) 176
Phospholipids	
interaction with ellipticine in model membranes	107 (1979) 155
photosensitization and quenching of singlet oxygen	108 (1979) 152
Phosphoramidon, effect on leucine transport in microvillar membrane vesicles of pig kidney	101 (1979) 407
Phosphorescence polarization, study of proteins in membranes	108 (1979) 161
5-Phosphoribosyl-1-pyrophosphate, relation with transformation of chick embryo fibroblasts	103 (1979) 43
Phosphorylase	
kinase	
–deficient mice, effect of insulin on glycogen synthase	105 (1979) 235
effect of calcium and calmodulin	105 (1979) 321
of rabbit skeletal muscle, effect of calmodulin and troponin	104 (1979) 25
effect on glycogen synthase	106 (1979) 181
NMR-study of pyridoxal-5'-phosphate action	108 (1979) 209
of <i>Escherichia coli</i> and potato	109 (1980) 59
phosphatase, of skeletal muscle	105 (1979) 239
Phosphorylation	
effect on activity of 3-hydroxy 3-methylglutaryl coenzyme A reductase	110 (1980) 195
effect on chromatin transcription	107 (1979) 160
of acetyl-CoA carboxylase, relation with activity	103 (1979) 333
of actin and inhibitory activity on DNase I	104 (1979) 284
of 5,6-dichlororibofuranosylbenzimidazole in salivary gland cells of <i>Chironomus tentans</i>	107 (1979) 431
of glycogen synthase	106 (1979) 279; 106 (1979) 284

of microsomal proteins, effect on surface potential and enzyme activities	103 (1979) 260
of non-histone chromosomal proteins	107 (1979) 193
of pyruvate kinase by cyclic AMP-dependent protein kinase in rat liver cytoplasm	101 (1979) 289
of rat mammary gland ATP-citrate lyase	109 (1980) 205
of sarcoplasmic reticulum ATPase	108 (1979) 495
role in regulation of pig heart pyruvate dehydrogenase phosphatase	108 (1979) 485
study in biological systems of energy production	107 (1979) 1
<i>see also</i> , Photophosphorylation: Cyclic photophosphorylation	
<i>o</i> -Phosphoserine, alkali stable peptide esters	110 (1980) 308
<i>o</i> -Phosphothreonine, alkali stable peptide esters	110 (1980) 308
Phosvitin kinase FII, of bovine brain	108 (1979) 200
Photoacoustic spectroscopy, study of photosynthesis	101 (1979) 321
Photoaffinity labelling, of tyrosine chemoreceptor in <i>Pseudomonas aeruginosa</i>	105 (1979) 43
Photo-CIDNP, NMR-study of glyceraldehyde-3-phosphate dehydrogenase	107 (1979) 288
Photoeffect, of α -terthienyl and phenylheptatriene on erythrocyte enzymes	107 (1979) 134
Photophosphorylation, of nucleotide analogs by chloroplasts	106 (1979) 251
Photosynthesis	
effect of <i>N,N'</i> -dicyclohexylcarbodiimide on electron flow	108 (1979) 136
in cyanobacteria, adaptation to salt	110 (1980) 253
localization of water-splitting site in chloroplast membranes	105 (1979) 177
role of transhexadecenoic acid and phosphatidylglycerol	106 (1979) 414
study by photoacoustic spectroscopy	101 (1979) 321
study of oxygen evolution	110 (1980) 57
Photosystem	
I	
detection of allophycocyanin	101 (1979) 110
EPR-study of intermediate in primary photochemistry	101 (1979) 105
of <i>Phormidium laminosum</i> , EPR-study of iron-sulphur centre	107 (1979) 422
time-resolved spectroscopy of reaction centers	107 (1979) 313
II	
effect of pyridozinone herbi	108 (1979) 226
EPR-study of light-induced signals at low temperature	101 (1979) 101
loss of sensitivity to diuron after proteolysis	103 (1979) 22
oxygen-evolving particles from blue-green algae	107 (1979) 308
study of chlorophyll <i>a</i> -protein complex	110 (1980) 53
temperature-dependent conformation change	107 (1979) 137
I and II, fluorescence decay and energy transfer at low temperature	102 (1979) 139
Phycobilins, uncoupling of energy transfer to chlorophyll in <i>Anacystis nidulans</i>	107 (1979) 4
Phycobilisome-thylakoid membrane, temperature-dependent changes in attachment	104 (1979) 327
Phytoalexin synthesis in soybean	101 (1979) 90
Pigment system I, effect on reaction II component of <i>P-515</i> in chloroplasts	106 (1979) 257
Pinosylvine synthase, induction by ultraviolet light in <i>Pinus sylvestris</i>	108 (1979) 349
Pituitary cell	
line (GH3/B6), effect of VIP on prolactin release and cAMP production	104 (1979) 165
study of gonadotropin release	104 (1979) 410
Placental tissue, stereospecificity etorphine binding	103 (1979) 362
Plasma membrane	
glycoprotein involved in adhesion of <i>Polysphondylium pallidum</i>	108 (1979) 379
labelling with diiodosulphophenylthiocyanate	108 (1979) 119
localisation of Na ⁺ ,K ⁺ -ATPase in hepatocytes	108 (1979) 374
protein synthesis during development of the slime mold <i>Polysphondylium pallidum</i>	108 (1979) 219
Plasma membranes	
of kidney epithelial cells (MDCK), demonstration of protein asymmetries	105 (1979) 201
of liver, modification of actin	104 (1979) 284
of rat liver, effect of amphopterin B on adenylate cyclase system	106 (1979) 21
Plasmid	
ColEI-Ap ^r carrying gene <i>tufB</i> of <i>Escherichia coli</i>	102 (1979) 207
-mediated steroid, degradation in bacteria	102 (1979) 311
of <i>Anacystis</i> sp. 6311 and <i>Oscillatoria limnetica</i>	107 (1979) 165

of <i>Escherichia coli</i> , presence in yeast strains	108 (1979) 179
Plasminogen, purification by affinity chromatography with immobilized Procion red HE-3B	103 (1979) 162
Platelets	
binding of wheat germ agglutinin	110 (1980) 330
effect of storage on actin binding protein	102 (1979) 257
resonance Raman spectroscopy study	101 (1979) 39
uptake of serotonin in schizophrenic patients	101 (1979) 134
Polarography, oxidoreduction properties of coenzyme M	108 (1979) 481
Poly(A)-containing mRNA	
complexity in mouse brain	103 (1979) 138
for phosphoenolpyruvate carboxykinase	109 (1980) 112
of <i>Dictyostelium discoideum</i> , translation in <i>Xenopus laevis</i> oocytes	104 (1979) 275
of rat prostate, translation in <i>Xenopus laevis</i> oocytes	103 (1979) 81
of <i>Rhodospirillum rubrum</i>	109 (1980) 31
Poly(ADP)	
ribose polymerase, effect on histones of calf thymus	110 (1980) 227
ribosylation, modification of chromosomal proteins	108 (1979) 13
Poly(L-Ala), study of delta helix structure	101 (1979) 11
Polyamine	
effect of <i>S</i> -adenosylmethionine and methylglyoxal- <i>bis</i> -(guanylhidrazone)	110 (1980) 323
synthesis, during development of <i>Leishmania</i> species	106 (1979) 202
Polyamines	
effect on aminoacyl-tRNA synthetases of yellow lupin	109 (1980) 63
effect on interaction of casein kinase and endogenous inhibitor	108 (1979) 508
Polydeoxythymidylate, effect on globin synthesis	110 (1980) 333
Polyestradiol, binding of estradiol	107 (1979) 42
Poly(I)–poly(C), characterization of induced interferon in mouse L-cells	109 (1980) 137
Polylysine–DNA complex, effect of bisulfite on conformation	107 (1979) 129
Polymorphonuclear leukocytes	
effect of BW 755C on arachidonic acid metabolism	110 (1980) 213
effect of protease inhibitor on superoxide production	107 (1979) 331
generation of oxygen species	110 (1980) 283
role of mannose-like receptors in phagocytosis of <i>Escherichia coli</i>	105 (1979) 307
study of chemiluminescence	102 (1979) 38
study of formation of phagocytic vesicles	106 (1979) 171
Polynucleotides, NMR-study of interaction with clupeine	110 (1980) 21
Polypeptide, of mitochondria from brown adipose tissue	101 (1979) 35
Polyphosphoinositides, effect of ACTH and vasopressin on metabolism in rat brain	105 (1979) 110
Polyprenyl phosphate, effect on inactivation of glycosyl transferase by detergents	108 (1979) 111
Potassium	
effect on α -adrenergic stimulation of gluconeogenesis	106 (1979) 189
effect on polydeoxythymidylate inhibition of globin synthesis	110 (1980) 333
ionophores, effect on ouabain-resistant potassium transport in reticulocyte cell membranes	103 (1979) 172
transport	
effect of inhibitors in erythrocytes	110 (1980) 65
in reticulocyte cell membranes, effect of ionophores	103 (1979) 172
Potato leafroll virus RNA	101 (1979) 169
Potato virus X RNA, translation into protein	109 (1980) 151
Pregnancy, occurrence of riboflavin-carrier protein	110 (1980) 209
Procion red HE-3B, use in affinity chromatography of plasminogen	103 (1979) 162
Procollagen	
synthesis in Schwann cells	102 (1979) 64
type III, formation by a continuous Rhabdomyosarcoma cell line	104 (1979) 405
(Pro ⁵)-enkephalinamide analogs, circular dichroism study	110 (1980) 136
Profilin, of calf spleen	101 (1979) 161
Progesterone, assay by antibody enhanced chemiluminescence	104 (1979) 201
Prolactin, effect of vasoactive intestinal peptide on release rat pituitary cell line (GH3/B6)	104 (1979) 165

FEBS LETTERS

Prostaglandin

E₁

effect of 12- <i>O</i> -tetradecanoyl-phorbol-13-acetate on cyclic AMP response	103 (1979) 38
effect on adenylate cyclase in fat cells	107 (1979) 100
-stimulated accumulation of cyclic AMP, effect of epidermal growth factor	102 (1979) 329
endoperoxides, conversion to thromboxanes	105 (1979) 291
synthesis, by glomerular cultured cells	104 (1979) 420
Prostatic binding protein, synthesis and glycosylation in <i>Xenopus laevis</i> oocytes	103 (1979) 81

Protease

effect on cation dependency of adenylate cyclase	107 (1979) 105
inhibitors	
effect on alkaline phosphatase isoenzyme conversions	105 (1979) 147
effect on leukocyte superoxide production	107 (1979) 331
of human skeletal muscle, activation by calcium	104 (1979) 355

Proteases

and hormone action	106 (1979) 1
of dog heart, role of calcium in activity	109 (1980) 129

Protein

A-invertase monoconjugate, use in enzyme immunoassays	107 (1979) 73
binding of albumin and nitrogenase, NMR-study	101 (1979) 31
biosynthesis, study of mRNA translocation	110 (1980) 169
-chlorophyll <i>a</i> complex, of photosystem II	110 (1980) 53
delta helix, in <i>lac</i> repressor protein	101 (1979) 11
-DNA interaction, protection against exonuclease III	109 (1980) 159
factors of mitotic CHO cells, effect on meiotic maturation in <i>Xenopus laevis</i> oocytes	109 (1980) 233
HU of <i>Escherichia coli</i>	106 (1979) 297
kinase	
activity, associated with calsequestrin	103 (1979) 81
of thylakoid membranes, study of light dependency	103 (1979) 342
phosphorylation of non-histone chromosomal proteins	107 (1979) 193
relation with cyclic AMP and testosterone synthesis in mouse Leydig cells	107 (1979) 398
specifity for Δ -isomer of β , γ -bidentate Co(NH ₃) ₄ -ATP	103 (1979) 265
see also, 3',5'-Cyclic AMP-dependent protein kinase: 3',5'-Cyclic AMP-independent protein kinase	
oscillation in content during cell growth of <i>Acanthamoeba castellanii</i>	109 (1980) 21
p22 of encephalomyocarditis virus	108 (1979) 1; 108 (1979) 6
prediction of quarternary structure	101 (1979) 7
<i>recA</i> of <i>Escherichia coli</i>	106 (1979) 349
S, vitamin K-dependent protein of bovine plasma	101 (1979) 377
structures, study by solid state and solution NMR	110 (1980) 133
synthesis	
control of initiation in mammalian cells	110 (1980) 1
effect of Cibacron blue F3GA in eukaryotic cell-free systems	110 (1980) 297
effect of streptomycin in streptomycin-producing <i>Streptomyces griseus</i>	110 (1980) 250
in chick small intestine, effect of cholecalciferol	108 (1979) 17
in <i>Xenopus laevis</i> oocytes, translation of prostatic mRNA	103 (1979) 81
of <i>Dictyostelium discoideum</i> species in <i>Xenopus laevis</i> oocytes	104 (1979) 275
role of ribosomal proteins L7 and L12 in peptide chain termination	109 (1980) 228
selective inhibition in virus-infected cells	110 (1980) 341
transport, from cytoplasm to mitochondria	103 (1979) 203

Proteinase

-inhibiting serum proteins	108 (1979) 461
inhibitor of aubergine fruits	104 (1979) 322
of rat liver mitochondria	103 (1979) 168; 105 (1979) 317
role in mitochondrial biogenesis	105 (1979) 373

Thyroid hormone synthesis, relation with thyroglobulin structure	102 (1979) 82
Thyroxine-binding globulin, modification by <i>p</i> -iodophenyl-sulfonyl(pipsyl)chloride	102 (1979) 306
Thyrotropin	
effect of cytoplasmic factor on thyroid adenylate cyclase system	107 (1979) 269
releasing hormone (TRH)	104 (1979) 165
Time-dependent uptake of steroids in cells and cell nuclei	103 (1979) 355
Time-resolved	
absorption anisotropy after flash photolysis of microsomal cytochrome <i>P</i> -450	102 (1979) 151
fluorometry, of actin-DNase I complex	109 (1980) 216
fluorescence spectroscopy	
of photosystem I and II at low temperature	102 (1979) 139
study of excitation energy transfer in pea chloroplasts	104 (1979) 223
spectroscopy	
of bacteriorhodopsin	109 (1980) 189
of chlorophyll- α in class II chloroplasts	103 (1979) 291
photooxidation kinetics of cytochrome <i>c</i> ₂ of <i>Rhodospseudomonas sphaeroides</i>	105 (1979) 137
of photosystem I reaction centers	107 (1979) 313
study of electron acceptor A ₁ of photosystem I	110 (1980) 50
Tissue degeneration, measurement of acute phase proteins with use of lectins	109 (1980) 257
Tobacco XD cells, presence of ornithine decarboxylase	104 (1979) 146
α -Tocopherol, quenching of singlet oxygen	108 (1979) 152
2- <i>p</i> -Toluidinonaphthalene-6-sulphonate, energy transfer inhibitor in chloroplasts	102 (1979) 121
Tomato fruits, presence of ornithine decarboxylase	104 (1979) 146
α -Toxin of <i>Naja naja siamensis</i> , photoaffinity labelling by 4-fluoro-3-nitrophenylazide	103 (1979) 27
Transfer RNA (tRNA)	
analysis of population from <i>Drosophila melanogaster</i>	105 (1979) 70

conservation of structure among plant species	102 (1979) 194
gene, localisation in chloroplast DNA	103 (1979) 52
genes enrichment in nucleosomal DNA by reversed phase chromatography	105 (1979) 254
interaction of unusual nucleoside, t ⁶ A, with manganese and magnesium	106 (1979) 63
occurrence of acetone of 5-methylaminomethyl-2-thiouridine	103 (1979) 270
of hamster mitochondria	109 (1980) 223
Transferrin	
accumulation by isolated rat liver mitochondria	105 (1979) 85
protein and iron transport by cultured rat fibroblasts	108 (1979) 127
role of ceruloplasmin in formation	110 (1980) 268
Transformation	
of chick embryo fibroblasts, relation with phosphoribosyl pyrophosphate concentration	103 (1979) 43
of yeast strains by chimeric plasmids of <i>Escherichia coli</i>	108 (1979) 179
Transglycosylation, of peptidoglycan of <i>Escherichia coli</i> K-12	110 (1980) 241
Transhexadecenoic acid, role in light reactions of photosynthesis	106 (1979) 414
Transmembrane proteins, study of secondary structure of precursors	103 (1979) 308
Transpeptidation during peptidoglycan synthesis in cell membranes of <i>Bacillus megaterium</i>	101 (1979) 244
Transport by proteins	103 (1979) 1
Tribenzyl phosphate, effect on phosphate transport and ATP synthesis in yeast mitochondria	102 (1979) 18
Tricarboxylic acid cycle	
intermediates, effect on glutamate decarboxylase	105 (1979) 155
effect of NADPH/NADP on isocitrate flux in <i>Escherichia coli</i>	105 (1979) 333
Trifluorothymidine–asialofetuin complex, effect on virus DNA synthesis in hepatocytes	103 (1979) 47
Triiodothyronine	
effect on synthesis of rat heart myosin isoenzymes	101 (1979) 143
effect on the proteins of liver mitochondria	108 (1979) 40
Tris(ethylenediamine)cobalt, effect on NADH oxidation	108 (1979) 28
Triton X-100	
effect of polyprenyl phosphate on inactivation of glycosyltransferase	108 (1979) 111
effect on thyroid-stimulating hormone binding to thyroid and testis	107 (1979) 45
isolation of photosystem I	101 (1979) 105
Tropomyosins, of rabbit heart and skeletal muscle	105 (1979) 232
Troponin	
C, NMR-study of calcium binding proteins	104 (1979) 123
effect on phosphorylase kinase of rabbit skeletal muscle	104 (1979) 25
